Re: Sam's Hollow Water Co

Mr. Carlson:

As a share holder in the Fish Haven Water Users Company, each share allows the owner to use the water for three hours per share. Each shareholder normally gets three turns each year. Our By Laws allow for us to limit the amount of water in our upper ditches(upper north and upper south). Sam's Hollow Water Co. has 140.5 shares at 3 hours per share equals 421.5 hours of usage per turn. With three turns per year that equals 1264.5 hours a year or 52.7 days. A share holder is only allowed to use water when it is their turn.

Sincerely

Bill Stock
President
