

RECOMMENDATION OF WATERMASTER

Application No: Transfer 72214
Water Right No: 36-16310
Applicant Name: Mountain View Land

Watermaster's Recommendation:

- a) ☐ I do not oppose approval of this application
- b) ☒ I do not oppose approval of this application if it is conditioned as follows:

115 – mag meter requirement

In the event that this right is subject to future priority curtailment, mitigation must be provided before diversions may continue. (see additional comments)

Transfer authorizes one (1) additional point of diversion only.

- c) ☐ I oppose approval of this application(s) for the following reasons:

- d) ☐ Additional comment:

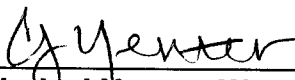

Mitigation requirement: this right has a 1950 priority and is not subject to any pending water calls, although it may not be immune to future calls, orders, or actions of ground water districts. Once changed to commercial use, it is not governed by the same statutes as irrigation rights within Ground Water Districts. The mitigation condition should reflect that mitigation must be provided if necessary.

Six existing wells at an existing dairy, including two D/S wells, all measuring and reporting to Water District 130. One of the wells, drilled a few years ago, is not appurtenant to any water right and this transfer is being utilized to authorize its use. Therefore only one new well is authorized for construction. The pods are identified as follows:

D0016355	West Dairy East Well
D0016356	West Dairy West Well
A0004696	East Dairy West Well
D0023363	East Dairy East Well (unauthorized pod)
A0004697	East Dairy Mother's Well (D/S)
A0004698	East Dairy Kev's Well (D/S)

Dated: December 29, 2005

Water District 130

Cindy J Yenter, Watermaster
