

MEMORANDUM

Date: December 29, 2005
To: Transfer 72314
From: ameritt
Re: sufficiency memo

This application proposes to add additional land to the service area of the company. No additional irrigated acres are proposed to be added to the water rights but the shares in the company are desired to be moved around.

Authority to File:
The applicant is the present owner listed on the data base.

Water Right Validity:
Validity of the rights involved: All rights involved have been partially decreed in the SRBA.

Injury to Other Water Rights:
None apparent.

Enlargement of Use:
Does not appear to be any if rights conditioned to not allow more acres to be served.

Local Public Interest:
It is in the local public interest to allow flexibility to irrigate best crop land.

Beneficial Use/Conservation of Water Resources:
No issue identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Other issue: As decreed only one SDE point identified for PD for diversion for north and south ditches. This will be corrected to associate one SDE point for the north ditch and one for the south ditch at approval of transfer.
