Re: License Review

Examiner did not measure or record the amount of irrigation occurring on each lot under this system. In light of this, we will remove irrigation use and allow 1.2 af per home rather than assuming each lot is irrigating exactly 1/2 acre. We will also add condition to limit domestic irrigation to 1/2 acre per lot. There was no place of use overlap found for these lots.

Examiner states that stockwater use was included on this permit. The only mention of stockwater is under item 8 on application form which states 12 horses/cows would be drinking water. This small number of stock can be considered part of the domestic use and does not need to be shown on license, especially since there was no stockwater use identified under item 4 of the application.
