

MEMORANDUM

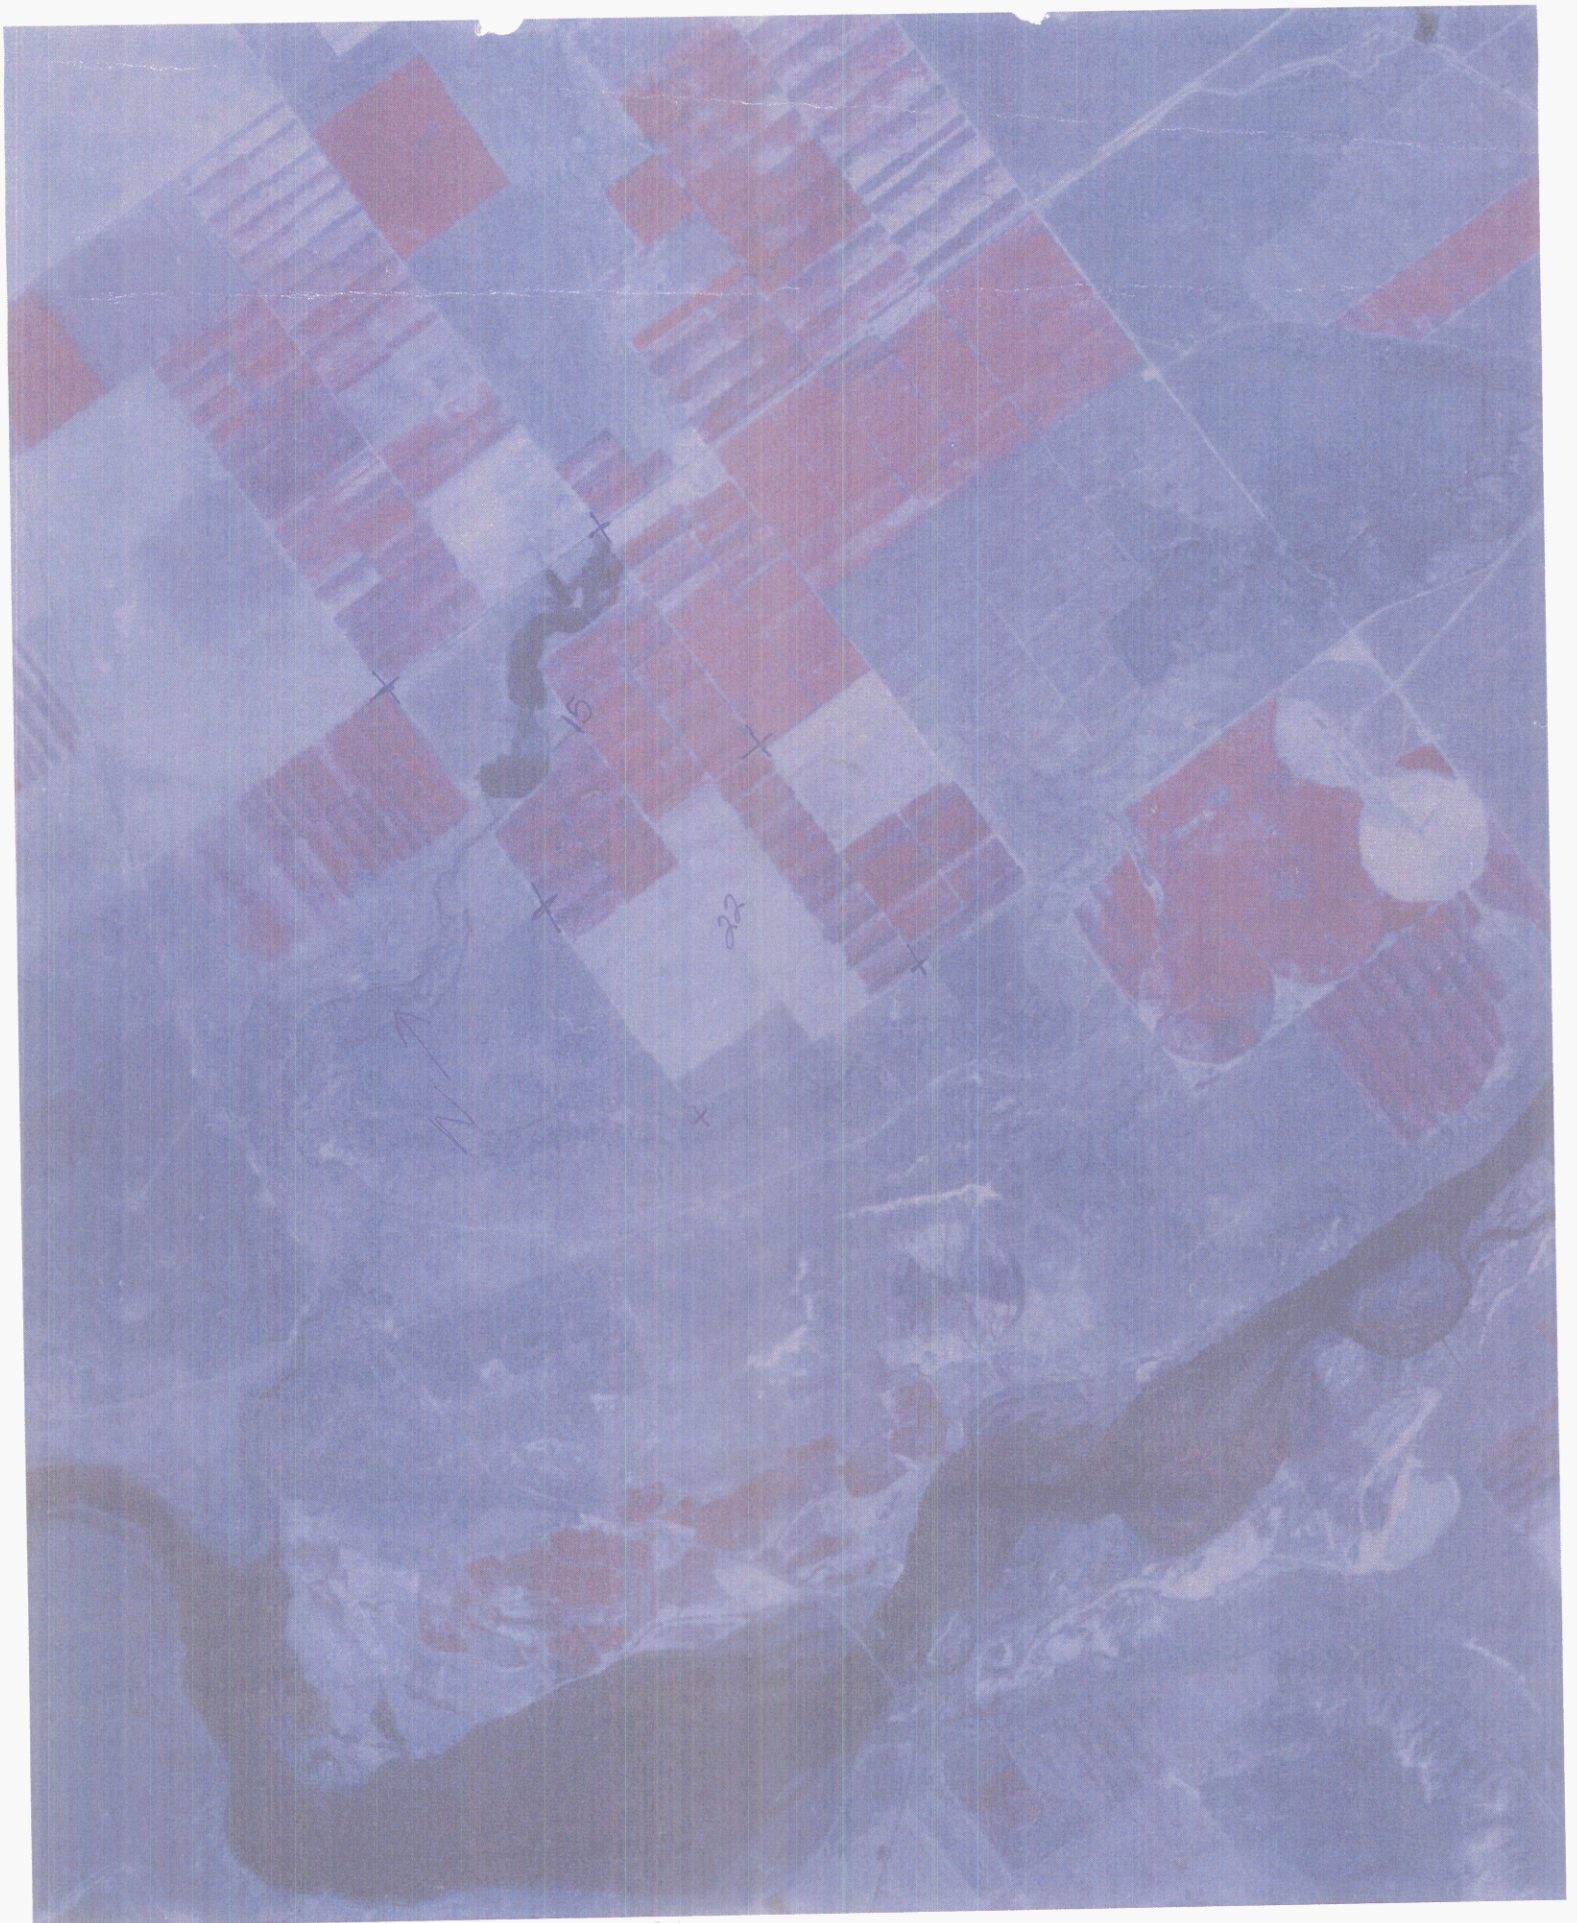

Date: December 12, 2005
To: Water Right File 2-2345
From: kwalker
Re: License Review

After receiving my letter of 11/21/2005 South Elmore came into the office and discussed their water rights with Shelley. South Elmore requested that the SRBA change their recommendations so that this right could cover lands in the SW¼ of S15, and NW¼ of S22, T5S, R6E. Verification of irrigation of these lands was done through Flight 6102-75-131 (June 8, 1975). See copy of the lands during this flight attached. The irrigation company does not want their rights under a ppu or a large pou description so each right has its own place of use that is covered. There is no place of use overlap for the lands as found by pou comparison run this morning. The point of diversion overlap found all rights when combined shall not exceed 131.14 cfs which was the measured capacity when exam was made in 1984.
