

MEMORANDUM

Date: December 12, 2005
To: Water Right File 79-14137
From: kwalker
Re: Permit Review

Recommend licensing as proposed by examiner. This right was originally developed under 79-7093 which was split into 79-14137 and 79-14138 due to development of 2 separate ponds. Priority date has been corrected as described in file. Evidence in file shows Northern region prepared and mailed application to applicant on 4/26/77 and application and fee were submitted on 5/2/77. Priority date should be 5/2/77.

License amount should reflect the water in the pond and evaporation losses. Took surface area of pond and multiplied by 3.0 afa to come up with an additional 0.003 which rounds to 0.1 af allowable by license as examiner recommended.
