DEPARTMENT OF
WATER RESOURCES

Pam,

The protests for this transfer have been withdrawn. The applicant and Del Khotz are anxious to get this approved. I've modified the draft approval since the application was amended to include another right and the place of use was changed since we first drafted the approval. (Note the amendment was amended to change what lands were dried up.) I've modified SDE to show how the unchanged portions and the new configuration are intended.

*Note the last amendment to clarify the unchanged portions of the Prescott rights is missing a part 2 for 36-4157F. The previous amendment had that page...I just think it is an oversight.

Since the original transfer data entry the Prescott rights had transfer 71709 approved which changes the parent right this transfer needs to be approved from. The pedigree needs to be updated.

Proposed 36-16241 and 36-16242 should be children of 36-16300 and not 36-16195

Proposed 36-16243 and 36-16244 should be children of 36-16302 and not 36-16197

*Please find updated Prescott split spreadsheet in file showing this as well as red notations on revised approval.

I'm sending the file to the state office. I think it is pretty clean but we can talk more if you want further revisions.

Allen
