APPLICATION FOR PERMIT

To appropriate the public water of the State of Idaho

A pond was dug on the lowest point on our property last spring to collect irrigation runoff from our upper fields. A pump in the ponds applies water to a field below the pond via a big-gun sprinkler; our irrigation rights cover all the property, and no additional land is watered due to the sprinklers. A spring located just above the pond runs all year, and the pond is deep enough (6 feet during the non-irrigation season, 8 feet in summer) to intercept the natural ground water. The pond always has some water in it, so this application is being filed to cover the non-wastewater storage. Some trout will be put in the pond for personal use, so recreation is included. The pond covers less than 1/2 acre at the surface.
