1. kwalker 11/18/2002 Point of Diversion

Comment: The point of diversion for this right is in the NWSWSE pursuant to field examiner. However, other rights from this well have been recommended as being diverted in SWSWSE so I am recommending that the point of diversion for this license be shown as SWSE, S6, T9S, R31E. Other rights from this well are: 41-07030, 41-07034 and 41-07076. Rt. 41-07071 is for a smaller well in same 40 acre tract. The rights, when combined, do not exceed capacity of system until this right is added. A capacity and volume limiter will apply when this right is licensed.
