Re: license review

PoD and PoU in completely different sections. P49 if not amended.

From the field exam map drawings and notes, it appears that the stretch of stream used for stockwater is totally within the NWNW of section 32, even though the field examiner recommended something different. This conclusion is also supported by the tax lot data in ArcView which indicates that the NWNW is the only portion of section 32 Mr. Widner owns.
