Re: Williams Lake Recreational Water and Sewer District

Dear Sirs:

We hereby protest the proposed amendment to add a point of diversion in the SWNESE Sec. 34 T20N R21E, Lemhi County, to change the use to MUNICIPAL with an increased diversion rate ^{by} 0.21 cfs.

We are property owners in the Lake Creek Subdivision and we receive our water from Lake Creek Spring for domestic use. Currently there are 10 homes supplied by this system. Lake Creek Spring fluctuates in direct proportion to the use at Williams Lake Water District. Readings of flow at Lake Creek Spring on June 20, 2005 and Aug. 22, 2005 (during high water use in the summer at the above District) was 16 GPM. The reading on Oct. 21, 2005 during the off season was 43 GPM.

The Water District is seeking to increase their flow by 40% over present use. This will seriously affect our use and have disasterious affects on our property.
