

MEMORANDUM

Date: November 09, 2005
To: File for Transfer 72235
From: Pam Skaggs 
Re: Original Well

Review of Transfer 72235 found that the original well as sited on the map was also in conflict with the legal description associated with it. Region staff discussed the matter with the applicant's consultant. He agreed that the map reflected the correct location of the well, and the legal description for the existing well was modified on the transfer application to correct the QQ from **SESW** to **SWSE**, S14, T2S, R4E. No change to the original well is proposed, just correction of the legal description.
