**Re: Request for Time Extension
Proof of Beneficial Use
Water Right No. 61-11963(formerly 61-2206)**

Attention: Deborah J. Gibson:

Dear Mrs. Gibson:

This letter is a follow up to our recent conversation regarding Water Right No. 61-11963(formerly known as 61-2206).

In the late summer of 2004, we requested that GJ Vertiline pump of Twin Falls check the two wells on our property. They measured the wells and reported that both wells had very little water in them. They indicated that the South well had a broken set of bowls in the bottom and the North well was "sanded" in to approximately 415'.

We contacted a local well driller, Johnson Well Drilling of Melba, Idaho. He was working on another project in the area and was willing to do the work; but he needed to complete the project he was working on, prior to starting this one. He arrived on our farm about mid July, and has been working on the North well. He has put about 160' of casing in the hole and has cleaned the hole down to approximately 630' level.

He should finish this project on or about the 23rd of September. We have scheduled a test pump with GJ Vertiline for the last week in September.

We are requesting an extension, due to the fact that we will not have enough time to test pump the hole, schedule Idaho Power for a transformer installation and order and install the permanent pump and motor prior to the deadline of 10-26-05.

We appreciate your consideration of our request. Please contact me at 208-599-0400 if you should need additional information.

Sincerely,

A handwritten signature in black ink, appearing to read "Jack Post", written over a horizontal line.

Jack Post

Proposed Well Location: Township 04S, Range 05E, Section 36, NW, NW, SE
COUNTY ELMORE

Street Address of Well Site: 1/2 mi W & 1/2 mi N of intersection of Division & Beet Dump Rd
MOUNTAIN HOME ID

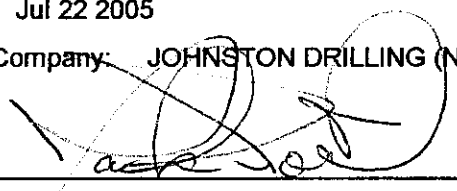

Proposed Use of Well: Irrigation

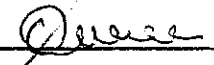

Well Construction Information:

- A. Deepening
- B. Proposed Surface Diameter: 20 Inches. Proposed Depth 645 Feet.
- C. Anticipated Bottom Hole Temperature: 85F and less

Construction Start Date: Jul 22 2005

Anticipated Well Drilling Company: JOHNSTON DRILLING (No. 92)

Applicant's Signature:  Date 7-22-05

Title: 

Well ID # 352355

Well Tag No. D0020811

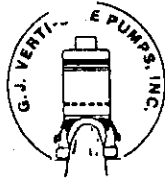

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This permit is Approved on Friday, July 22, 2005.

1. This drilling permit is valid for two (2) months from the approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
2. This permit does not constitute an approval of the local Health District or the Idaho Department of Environmental Quality which may be required prior to construction of this well. The local Health District should be contacted for septic tank/drainfield locations. Domestic wells must not be drilled closer than 100 ft. from any drainfield and 50 ft. from any septic tank. Public Water Supply wells must not be drilled closer than 100 ft. from any drainfield or septic tank.
3. The well shall be constructed by a driller currently licensed in the state of Idaho who must maintain a copy of the drilling permit at the drilling site.
4. Approval of this drilling permit does not authorize trespass on the land of another party.
5. This permit does not constitute other local, county, state or federal approvals that may be required for construction of a well.
6. This drilling permit does not represent a right to divert and use the water of the State of Idaho. If the well being drilled is associated with approved water rights(s) use of the well must comply with conditions of said water right(s).
7. If a bottom hole temperature of 85 Degrees F (29.44 oC) or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department of Water Resources immediately.
8. Idaho Code, S 55-2201 - 55-2210 requires the applicant and/or its contractors to contact "Dig-line" (Dig-Line is a one-call center for utility notification) not less than 2 working days prior to the start of any excavation for this project. The "Dig-Line" Number for this location is 1-800-342-1585
9. Please be advised that this drilling permit should be considered and treated as a preliminary permit. If you are in disagreement with this preliminary permit you have fourteen (14) days of the service date of this permit to petition the Idaho Department of Water Resources for reconsideration, pursuant to Section 67-5243, Idaho Code.
10. The well tag for the drilling permit/start card shall be securely and permanently attached to the well casing through welding or by the use of four closed end domed stainless steel pop rivets. The tag attachment will be done at the time of completion of the well, and prior to removing the drill rig from the drill site.
11. Repair of this well shall not compromise the casing and seal placed in this well which protects the groundwater resources of the State of Idaho.
12. Cleaning well to original total depth of 645 and placing a liner from 490 to 645; case off zones that are producing sands and clays and perforate through the conglomerate at 490 to total depth.
