RE: Water Right Permit No. 22-07287

Dear Permit Holder:

The Department of Water Resources has received your Application for Amendment and corresponding fee. You indicated in a telephone call earlier this week that 200 additional acres in the S $\frac{1}{2}$ S $\frac{1}{2}$ , Sec. 22, and the SE $\frac{1}{4}$ SE $\frac{1}{4}$ , Sec. 21, T7N, R42E may be associated with this project. You have a few options on how to resolve this issue.

In order for the additional acres to be included in an 800-acre permissible place of use, where you would be authorized to irrigate 600 acres per irrigation season within the 800-acre boundary, you must either supply evidence that the additional 200 acres was irrigated sometime during the authorized development period (between February 23<sup>rd</sup>, 1979 and June 17, 1981) or file an application for transfer of the water right once it has been licensed. If you provide evidence that the additional acres were irrigated during the authorized development period, the amendment can be revised accordingly. You cannot alter this water right to irrigate more than 600 acres per irrigation season because doing so would be an enlargement of water use from the permitted amount.

Please contact me within 14 days to inform me how you wish to proceed. If I do not receive communication from you within that time frame, I will assume you are not planning to submit evidence that the additional acres were irrigated during the authorized development period, and I will issue the license as depicted on the licensing amendment.

If you have any questions, please call me at (208) 287-4949 or send e-mail to [erin.retelle@idwr.idaho.gov](mailto:erin.retelle@idwr.idaho.gov).

Sincerely,

Erin Retelle  
Water Resource Agent
