RE: Application for Permit 98-7838

~~~~~  
**Northern Region has reviewed Idaho Fish and Game's letter regarding the above Application for Permit and respond as follows:**

**The applicant has indicated that there are no fish in the spring, or unnamed stream flowing from the spring. And this source is isolated from migrating fish as it is tributary to "sinks".**

**IDWR suggested to Fish and Game that they contact Mrs. Berges to discuss specific issues regarding their concerns. Mary Terra-Burns letter is opposed to "in-stream" storage, however, it is not a protest against this filing.**

**Northern Region recommends that this filing be approved.**
