Re: The Valley Club West Nine Public Groundwater Source Wells Application for Permit

Dear Ms. Baldwin:

Thank you for providing our office with the "Application for Permit" for the above referenced groundwater source proposal to IDWR.

It was determined from our review of the submittal that the applicant is proposing to drill two sixteen (16)-inch ground water source wells near the existing Valley Club Subdivision public water system, which will serve sixty two lots at build out.

With this in mind, please be aware that we do not have any comments relative to the source well proposal at this time. However, we are presently reviewing water supply and wastewater treatment design plans and specifications and may have comments relative to the project design upon completion.

If you have any questions, please do not hesitate to contact this office at 736-2190.

Sincerely,

A handwritten signature in black ink, appearing to read "Brian Reed".

Brian Reed, P.E.
