16. kwalker 8/15/2005 Schwenkfelder Ditch

Comment: I contacted the watermaster for district 67A this morning and was told the capacity of the ditch is 52.56 cfs. Mr. Roger Meyer (257-3418) stated there are 16 water rights on this ditch in the amount of 27.0 cfs so there is no problem with the licensing of this permit. There is plenty of water in the ditch.

17. kwalker 8/19/2005 Season of Use

Comment: This permit was issued with a season of use of 3/15 to 6/15 but there was a remark on the application form that states: June 15 - May be varied by approval of watermaster. In light of this, I recommend that we license this permit for the standard season of use for this area but add conditions limiting the use after June 15 to watermaster discretion.

18. kwalker 8/19/2005 Right 67-483

Comment: The draft recommendation of this right in the SRBA shows a place of use of 400 acres. That right is for 0.7 cfs and has a 1894 priority date. I discussed this with Dan Narsavage this morning and he implied that the recommendation was only a draft and since we determined only 330 acres are actually irrigated the recommendation will be changed to show the same 330 acres we are prepared to license. I indicated to Dan that the recommendation should not be changed until we get a signed licensing amendment back from the right holder which will indicate that he agrees with the place of use. A note has been place in SRBA file 67-483 that discusses our conversation this morning.
