Subject: Schwenkfelder Ditch

Watermaster, Water District 67A
Mr. Meyer:

I am preparing a license for a water right permit that is diverted from Schwenkfelder Ditch. As part of our licensing review, we like to make sure that the ditch is capable of carrying the water that we issue licenses for. I was wondering if you might have a measurement of the capacity of Schwenkfelder Ditch and if so, could you please e-mail that information to me? If you don't have a record of the ditch capacity, could you please let me know if there is always enough water available in the ditch to satisfy the water rights that are diverted from this ditch? Can all the water rights be delivered simultaneously? How do you deliver the water in this ditch in time of shortage? I tried to obtain this information from the 1980-1985 water district records but could not find the information that I needed. Any information you could provide would be very helpful.

Thanks!!
