

MEMORANDUM

Date: August 02, 2005
To: Water Right File 67-7508
From: eretelle
Re: license review

Pending ownership change, but claimed under new owner name in SRBA. Will inform McKee Bros. they can either pay to assign permit now, wait for ownership change by adjudication process.

PoD reported in NWNE on field exam, but using ArcView and the quad map, it seems to lie in the NENW as listed on the permit. Additionally, rights that share this ditch have their PoDs listed in the NENW. The PoD was kept in the NENW. PoD shared with Permits 67-7479 and 67-7420 and Right 67-7494. Capacity listed is not of the entire ditch, rather the re-diversion pump/system.

System capacity measured is 1/2 inch per acre.

Irrigation season adjusted to standard.

Amendment needed for acres in the NESW not listed on the permit. P44 letter if not amended.
