RECOMMENDATION OF WATERMASTER

Application No: Transfer 72177
Water Right No: 37-21491, 37-21492
Applicant Name: Diamond A Livestock

Watermaster's Recommendation:

- a) ☐ I do not oppose approval of this application
- b) ☒ I do not oppose approval of this application if it is conditioned as follows:

As drafted, plus:

No *additional* points of diversion to be constructed pursuant to this approval*

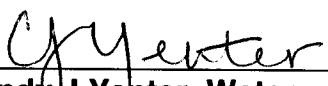

- c) ☐ I oppose approval of this application(s) for the following reasons:
- d) ☒ Additional comment:

*An existing well is to be used. The transfer only identifies a single pod. Spatial data are existing and appear accurate; site tag D0023311 was added by me during inspection.

37-10604 is also diverted from this well for domestic purposes. Diversions strictly for residential use will not be required to be measured since this right is not a part of the transfer. The flow meter must be installed on the line supplying the commercial facility. Does there need to be a flow rate limitation between 10604 and 21492, or does the claim presume the development of additional flow at the old truck wash?

Dated: September 1, 2005

Water District 130

Cindy J Yenter, Watermaster
