Re: Application for Transfer of Water Right 83-10557

Dear Mr. Forge:

The Department of Water Resources has received your application for transfer of a water right changing the point of diversion under Right 83-10057. We are returning the application to allow you to complete the following necessary items. The required information is described below.

The filing fee of \$100 was not submitted. ✓

The address on the front of the application is not complete (city, state, zip). ✓

The water right is also in the names of Dan Forge and Hal Forge. The warranty deed (submitted prior to the right being decreed in the Snake River Basin Adjudication) lists Dan and Hal and you as equal owners and as such, we must have some written documentation that Dan and Hal are in agreement with this transfer proposal. You can either have them sign the application next to your signature (notarization for their signatures will also be required) or you can provide some other written document to which they have affixed their signatures confirming their consent to the transfer. ✓

Please feel free to contact this office if you have any questions.

Sincerely,

Al Beardslee
Sr. Water Resource Agent
