Re: Evaluation of Sufficiency of Information Submitted

Transfer changes the point of diversion and proposes to drill a new well for a decreed water right currently used for the irrigation of 150 acres. Location of the proposed well is approximately 6.0 miles north and 2.0 miles east of Oakley. A previous transfer

is approximately 6.0 miles north and 2.0 miles east of Oakley. A previous transfer (71225) was approved on this right in January of 2005, which changed the place of use slightly. The transferred version is what was decreed. Now the applicants need to drill a new well because the old one is no longer producing enough. They mentioned that they may want to use the old well for some sort of recharge in the future so do not wish to actually abandon it but it will no longer be associated with this right.

- Authority to File:

IDWR Records show the water right in the name of the applicants, Phyllis and Frank Bedke. A release letter from the lien holder, U.S. Bank, was also provided.

- Water Right Validity:

The base right for the transfer was recently decreed in the SRBA in June of 2005.

- Injury to Other Water Rights:

None anticipated.

- Enlargement of Use:

None anticipated.

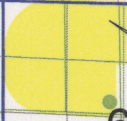

- Local Public Interest:

No negative impacts anticipated.

- Beneficial Use/Conservation of Water Resources:

Proposed use is recognized as a beneficial use of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
