RE: App For Transfer 71709

Dear Mr. Gulick;

It has come to our attention that the water system described in your pending water transfer consists of two connected wells rather than the single well that is described in your application. None of the information we received until now indicated that your domestic well is also hooked into the dairy. In order for you to use either well at your dairy and either well to serve your home, we suggest that your existing dairy and domestic rights be added to this application so that both wells can be made the legal points of diversion for all four water rights. If you agree, you need to file an amended application; I can assist you in this if you so desire. A \$50 processing fee is required, but the amended application will not have to be re-advertised. If you wish assistance, please call for an appointment.

Regards,

James E. Stanton
Sr. Water Resource Agent
