- c) ☐ I oppose approval of this application(s) for the following reasons:
d) ☒ Additional comment:

I may have originally advised Jim that only conditions R43 / 067 were necessary, however these rights are for irrigation within the water district and thus subject to the transfer memo conditions. Clear Lake Ranch already has an acceptable magnetic device installed but needs a new control valve so R43 remains pertinent. Clear Lakes CC is an existing reporter but needs devices replaced.

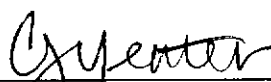

There is an additional right which needs to be added to the pod overlap condition on 4148B, 16237 and 16236. Clear Lakes Ranch diverts 36-8329 from the same location and into the same pipeline which conveys 16236.

Doesn't 36-16236 need to be included in the combined use limits? The 1.5 cfs split between 16236 and 16237 is a part of the original 3.5 cfs in that condition.

All diversions are presently reporting to WD130.
