

MEMORANDUM

TO: FILE 37-08720 *KW*

FROM: KAY WALKER

RE: Compliance with Order of May 26, 1993

Date: December 15, 2000

.....

I talked with John Faulkner this morning in regard to my letter of November 15, 2000. Mr. Faulkner had gone into the Southern Regional Office after receiving my letter and talked with Allen Merritt in regard to compliance with the order. Allen then faxed me a copy of what Faulkners had submitted on October 4, 1993, which they assumed would cover compliance with the order. Mike Faulkner came into the office on November 27 and discussed the matter with Shelley. We put the file on an additional 30-day call up to see if they submitted any additional information. In talking with John Faulkner this morning it appears they have no additional information to submit.

Mr. Faulkner said that they had dried up a pivot when the transfer was approved and put that land into CRP. He also mentioned that they might file another transfer to move the water back to the original well when the land comes out of CRP.

Twin Falls, Idaho 83301

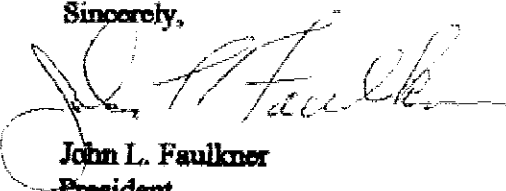

Re: License No. 37-8005

Dear Loren:

We will put a valve, lock and measuring port on the original pump or a smaller pump that will only pump the 2.01 cfs out of the old well. Either way we will be able to limit the flows to the required 2.01 cfs.

If you have any comments or questions, please feel free to call.

Sincerely,

John L. Faulkner
President
