*Re: Transfer Application for Logan D. Robinson
Our File No. 04-237*

Dear Mr. Warner:

Pursuant to your letter of June 2, 2005, I have gathered up both Warranty Deeds for the South Second property in which we are asking for some of the water rights to be transferred from and a Warranty Deed to the Inkom property which we would like the water rights to be transferred to. Both show that Logan Robinson is the registered owner of the properties.

Also, enclosed is a packet of information from the Department of Water Resources regarding the Turner Well Association, License No. 29-7700, which lists a group water right for that whole area out on South Second for which Logan Robinson has an interest in. For your records, I am also enclosing a copy of the map of the South Second property which shows the land owned by Logan and Ricky Robinson and the position of the Well which has both the domestic right and an irrigation right. As you know, we are just asking that the irrigation portion of that right be transferred to the parcel covered under the water right Claim No. 29-13623.

I am enclosing the two original maps that you submitted to me with drawings on them showing the new point of diversion. The Well is situated on Logan Robinson's property with 29-2409B water right and I have drawn in where the Well sits and that would be the new place of diversion and the new place of use is the 29-13623, three and a half acres that are to the North of the 29-2409B parcel.

Mr. Warner

Page 2

The Well that is situated on the South Second property under the water right 29-4393 has both a domestic use and an irrigation right. There is a Well house and a pump that allows for .07 cubic feet per second or 13.2 acre feet per year of irrigation.

I hope that this information is useful to you and is all that you need to continue to process the Application. However, if you need additional information or more clarification, please feel free to contact my office.

Best Regards,
