Re: license review

PoD needs amendment (in SESE instead of SENE or SENW) PoU also (acres in the S1/2 of the NE)

P49 if not amended.

Diversion rate less than 1in/acre. 0.5 cfs for 72 acres. I spoke to Lori Graves who completed the field exam. She indicated that the 72 acres was indeed irrigated, although the right holder does not run the sprinkler lines all at once. She said that the fields were all in hay when she was there. Lori also said that the right holder plans to apply for more water once he has moved here full-time, but that will be a separate permit and he will need a new pump, etc.
