Describe the reason for the proposed changes

I was having problems with my original well and recently drilled a second domestic and stockwater well. Rather than abandon the original well, I would like to have the flexibility to utilize both wells (original and new) if ever needed. In addition, the transfer will update the ownership of this water right.

A. Describe the expected quantity of the return flows and location of discharge after the proposed change

B. Describe the effects on other water uses resulting from the proposed change
