Re: Transfer No. 71222, Two Springs

Dear Sir or Madam:

In your interest, I attempted to process the above referenced transfer and have been denied by Boise reviews. It was determined that if allowed to proceed, it would likely result in what would be considered to be an expansion of the original right. Even if it were approved, the diversion from the new spring would be limited to those times that the right was available at the original source thus defeating your purpose of the transfer.

The option for proceeding forward with your intended project is to file an application for permit for a new water right for stockwater and then proceed with your project after the approval in the same fashion as was proposed. More than one water right can be used together.

I am returning your original application for transfer along with a blank application for permit. You may use the same maps in preparing the application for permit. The fee submitted for the transfer would be applied to the new application. If you wish to do otherwise, you may submit a written request for the return of the fee.

My apologies for the inconvenience. If you have any question please feel free to call.

Sincerely,

W. Roger Warner

Water Right Supervisor - Eastern Region
