

MEMORANDUM

Date: August 17, 2005
To: Transfer 71624 File
From: Jeanie Robertson
Re: Evaluation of Sufficiency of Information Submitted

Transfer proposes changing the place of use on four water rights to include a new QQ and shift acres in the existing ppu of 81 acres to a reduced total of 75 acres. {A previous transfer (#70248) was approved on the original property but not all of that property turned out to be irrigable so this will correct that also.} This transfer does not change the pods. 47-7538 was licensed from a hot well and continues to produce hot water while the other three rights were moved in and diverted from a new cold well. {In the previous transfer they were originally proposed to be diverted from the existing hot well, but the cold water splits couldn't be added to the low temperature geothermal well since it was in an aquifer of "different characteristics", in this case temperature.} This transfers also corrects some combined limits from transfer #70248: 47-16850, 47-16852, & 47-16854 = 0.49 CFS, 27.0 acres, & 108.0 af

These three with 47-7538 = 1.20 cfs, 75.0 acres, & 300.0 af (Irr) + 2.7 af (Stock) = 302.7 af Total Vol.

- **Authority to File:**
IDWR records show the applicant as the current owner of the rights involved with the transfer and a warranty deed shows the applicants own the acres in the new proposed pou.
- **Water Right Validity:**
The base rights for the transfer are SRBA recommendations, based on previous transfer #70248, approved in 2003.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated, acres will actually be reduced.
- **Local Public Interest:**
No negative impacts anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
