Subject: Permit 63-12530

Dear Joe:

The attached letter from Idaho Department of Water Resources provides authorization to utilize your domestic well, completed from 358 to 368 feet, for irrigation purposes under the water right permit 63-12530. All other conditions of the permit are unchanged.

Please note that the drilling permit (D0025103) for your well authorized a domestic well rather than an irrigation well. You will need to upgrade the drilling permit for irrigation use. The upgrade will consist of paying a \$125 fee. You should send a check for this amount to the Idaho Department of Water Resources, 2735 Airport Way, Boise, ID 83705, Attention: Rob Whitney. Please reference upgrade of permit D0025103 on the check.

If you have any additional question, please contact me.

Sincerely,

Terry M. Scanlan, P.E., P.G.

RE: Water-Bearing Zone for Permit No. 63-12530

Dear Terry:

In response to your request to deviate from the water-bearing zone of 380 to 430 ft. below ground surface described on Permit No. 63-12530, IDWR finds that the change is acceptable without filing an application to amend the permit. The change you have proposed -- diverting from a water-bearing zone of 350 to 400 feet below ground surface -- is not a "substantial change" to the proposed method of diverting water, and it is not likely to interfere with the ability of other ground water users to pump water from their wells. Please note that the well drilling permit issued by IDWR may have additional limitations.

If you have any questions, please call me at 208-287-4947, or email me at shelley.keen@idwr.idaho.gov.

Sincerely,

Shelley W. Keen
