

MEMORANDUM
Clayton Tree Farm
Expedited Transfer Request

From: J. Westra
Date: 8/2/05

RE: Replacement of Collapsed Well—NW of NW Sec. 13, 4N-5W
WR-#63-10578 Application for Transfer—Change Point of Diversion #63-10578

On 7/29/05 I met with Bill Clayton at his tree farm near Wilder. The supplemental well that compliments Wilder Irrigation Dist irrigation water had collapsed. Mr. Clayton would like to move the well from the **NW of NW** to the **SW of NW** to avoid possible problems caused by the old well. It would now also be closer to his headquarters for vandalism issues. The district water is planned to be turned off in mid-September, Mr. Clayton will need the supplemental well from late September on for his nursery stock. Arrangements have been made with Riverside Drilling—Parma to schedule the well construction in early Sept.

I would like to request this transfer be expedited and advertised in the first August public notice dates 8-9. If processing can not be completed by the advertising deadline, I would ask the transfer be advertised anyway to determine if there are protest issues.

-#63-21471 has the same P/D's per transfer 69621 but for domestic and stockwater. This right has been decreed and is included in the transfer.

-The new P/D was GPS'd to verify quarter-quarter location.
