3. kwalker 12/8/2004 License Review

Comment: While preparing this file for licensing I noticed that the place of use recommended by the examiner did not fall into the 2 forty acre tracts he had noted on his examination. I GISd the place of use as shown on map and found that irrigation falls into NWNE, S6 and S1/2SE, S31. Recommend we use the GISd place of use even though the shape covers more than 6.0 acres. The season of use has been updated to reflect the standard season for this area. No place of use overlap found.
