1. kwalker 12/30/2004 Place of Use

Comment: Application proposed place of use to be within SWSW, S35. Region noted on application form that the place of use would be within Gov. Lots 16 & 17 which are located within SWSW and SESW, S35. Recommend licensing without an amendment to the place of use since permit did list both government lots on form.

2. kwalker 12/30/2004 Term Limit

Comment: Contract with Idaho Power expires 35 years after issue date of 12/30/83. Recommend Director review of 12/30/2018 for condition.

3. kwalker 7/22/2005 Volume

Comment: Volume is based on USGS stream flow records for the springs under this system. Gaging station No. 13090370. We pulled in the stream flow records for the years available (5/1985 thru 06/1989) into excel and formulas were created that determined the exact volume available for these 2 permits. Found these amounts available for full years of records: 1986 = 16850.4 AF, 1987 = 17193.1 AF, 1988 = 16532.2. Recommend licensing this permit at 17200.0 AF which is the 1987 stream flow record and the largest volume amount determined rounded to nearest 3 significant digits per admin. memo - app. processing no. 6.

4. dgibson 12/28/2004 Reinstatement

Comment: Review of this file found for license issuance that the proof had been filed, and a field exam conducted and filed with the department. However, reinstatement had not been prepared. Reinstatement issued 12/29/04 reinstating permit with an advance of priority to 6/23/1982. The advance in priority was partially based on department error, and delay caused by the examiner (Brockway).
