RE: License Review of File 47-7679 & 47-7682

Date: August 13, 2004

.....

The SRBA requested that I license Permit 47-7679 so they can recommend it as a license in their report of that area. In review of Permit 47-7679 I found a problem with the second permit that was issued on the same system. This is a history of what I found while working on 47-7679 and in microfilm jacket of 47-7682.

10/18/1985 – proof of beneficial use submitted on 47-7679 and 47-7682

⁸
A/12/1986 – examination fee notice was sent to permit holder for both permits

11/4/1986 – examination fee sheets submitted for both permits - no fee required due to permit holder having certified examiner do field exams. Letter from certified examiner indicates he was hired to do exam on both permits.

8/12/1987 – Permits 47-7679 and 47-7682 lapsed since we had not received the field exam from certified examiner

5/4/1988 – field examination received which only mentioned Permit 47-7679.

8/2/1988 – Permit file 47-7682 was routed to “film and destroy” since it had lapsed in August of 1987.

8/30/1989 – Examination returned to certified examiner for clarification and also requesting information regarding permit 47-7682.

10/13/1989 – Certified examiner revised exam for 47-7679 and sent letter which states the examination was intended to be used for both permits.

July 1, 2004 – SRBA staff requested issuance of license on 47-7679 so recommendations could be made to Court as perfected right. Permits 47-7679 and 47-7682 both claimed under No. 47-14282 as a combined right.

August 13, 2004 – I requested Permit 47-7682 be reinstated since it has remained in lapsed status since August of 1987 which was an error on our part.
