1. kwalker 7/27/2005 Permit Review

Comment: Examiner found system to be as applied for. Only 1 well identified as being developed. Also checked for drilling permits in this area (due to condition #6 on permit) and there are no others on record for this qq.

Examiner did not complete his math on system capacity. He suggested a license for 1.4 cfs but I found that the system can produce 1.4483 cfs which rounds up to 1.45 cfs. Recommend using this as capacity.

2. KKNOBLOC 11/25/1994 DIVERSION DESCRIPTION

Comment: Two (2) wells and a new 225,000 gallon storage tank to be tied into the existing Spirit Lake water distribution system. OVERLAPPING WATER RIGHTS 96-04022, 96-07059, 96-07106

3. CZIMMERM 1/26/1995 PRIORITY DATE

Comment: The application was accompanied by check #1154 for the filing fees and receipted under N008462. The check was returned to the department by the bank as requiring two signatures. The check was returned to the applicant by Northern region office 12/9/94. Another check was issued (#1278) to replace the original check and was receipted under N008573 on 1/25/95. Date of priority has been advanced to the date that the total filing fees were received, 1/25/1995.
