TRANSFER NO. 5650
WATER RIGHT NO(S) . 33-02059/33-07189/33-07190/33-10988

CONDITIONS OF APPROVAL AND REMARKS

1. After specific notification by the department, the right holder shall install a suitable measuring device or shall enter into an agreement with the department to determine the amount of water diverted from power records and shall annually report the information to the department.
2. This right when combined with all other rights shall provide no more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
3. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
4. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
- *** 5. Right 33-02059 is limited to the irrigation of 225.0 acres in the place of use described above in a single irrigation season.
- *** 6. Right 33-10988 is limited to the irrigation of 225.0 acres in the place of use described above in a single irrigation season.
- * 7. Rights 33-02059 and 33-10988 when combined shall not exceed a total annual maximum diversion volume of 787.5 af at the field headgate and the irrigation of 225.0 acres.
- *** 8. Right 33-07189 is limited to the irrigation of 70.0 acres in the place of use described above in a single irrigation season.
- *** 9. Right 33-07190 is limited to the irrigation of 10.5 acres in the place of use described above in a single irrigation season.
10. Rights 33-02059, 33-07189 and 33-07190 when combined shall not exceed a total diversion rate of 3.45. cfs.
- ** 11. Rights 33-02059, 33-10988, 33-07189 and 33-07190 when combined shall not exceed a total diversion rate of 3.93 cfs, a total annual maximum diversion volume of 1032.5 af at the field headgate, and the irrigation of 295.0 acres.
12. Rights 33-02059, 33-10988, 33-07189 and 33-07190 when combined with Right 33-10033 shall not exceed a total diversion rate of 3.93 cfs, a total annual maximum diversion volume of 1032.5 af at the field headgate, and the irrigation of 295.0 acres.
13. Pursuant to Section 42-1412(6), Idaho Code, Rights 33-02059 and 33-10988 are subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
14. Use of ground water under Rights 33-02059 and 33-10988 is combined with water from Blaine County Canal Co.

MICROFILMED
JUN 15 2000

TRANSFER NO. 5650
WATER RIGHT NO(S). 33-02059/33-07189/33-07190/33-10988

CONDITIONS OF APPROVAL AND REMARKS

15. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with ground water diverted under Rights 33-02059 and 33-10988 and shall only divert ground water under these rights when water from the appurtenant surface water rights cannot be delivered to the right holder.
16. If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, Rights 33-02059 and 33-10988 to divert ground water shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
17. The period of use for the irrigation described under Rights 33-07189 and 33-07190 may be extended to a beginning date of 4/1 and an ending date of 10/31 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/15 and after 10/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.
18. Rights 33-07189 and 33-07190 are for the use of trust water and are subject to review 20 years after the issuance of the permit to determine availability of water and to re-evaluate the public interest.
19. Diversion and use of water under Rights 33-07189 and 33-07190 are subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.
20. The Director retains jurisdiction of Rights 33-07189 and 33-07190 and may change, add, or remove any requirement as determined to be appropriate.

Dated this 9th day of June, 2000.

WATER RIGHT LICENSE

WATER RIGHT NO. 33-07189

Priority: July 31, 1989

Maximum Diversion Rate: 0.80 CFS
Maximum Diversion Volume: 245.0 AF

This is to certify, that OWEN ROMRELL
HC 65 BOX 58
HOWE ID 83244

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated July 31, 1989; and has submitted Proof of Beneficial Use on March 4, 1992. An examination indicates that the works have a diversion capacity of 3.450 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	04/15 to 10/15	0.80 CFS	245.0 AF

LOCATION OF POINT(S) OF DIVERSION: Lot 1(NWNW), Sec. 19, Township 06N, Range 29E
BUTTE County

PLACE OF USE: IRRIGATION

<u>TWN</u>	<u>RGE</u>	<u>SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
06N	29E	19	NENE 30	NWNE 17	SENE 14	
			Lot 1(NWNW) 8	SENE 1		70

Total number of acres irrigated: 70

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right is for the use of trust water and is subject to review 20 years after the issuance of the permit to determine availability of water and to re-evaluate the public interest.
6. Diversion and use of water under this right is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.
7. The Director retains jurisdiction of the right issued to change, add or remove any requirement as determined to be appropriate.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

Re: Transfer prepared for Owen Romrell (33-02059, 33-07189, 33-07190, 33-10033 and 33-10988)

.....

I have prepared a transfer application for Owen Romrell to cover his entire farm with a ppu and correct errors made between licenses issued in 1995 and SRBA accomplished transfer recommendations. I am sending the transfer application out to Mr. Romrell today and wanted to let you know what my thinking was while preparing it. Shelley and I discussed this situation with Norm – amending the two licenses or "unstacking" rights with a transfer application. Norm preferred the latter so this is how I proceeded.

I have included four of Mr. Romrell's rights under the transfer. Shelley found the enlargement claim would be of dubious value once the transfer is approved. His determination was made using the following:

33-02059	225 acres	3.20 cfs	}	225 acres @ 3.93 cfs = 0.017 per ac
33-10988	225 acres	0.73 cfs		
				+
33-07189	70 acres	0.80 cfs	}	70 acres @ 0.92 cfs = 0.013 per ac
33-07190	10.5 acres	0.12 cfs		
				295 acres @ 3.93 cfs = 0.013 per ac

33-10033 was not included since lands will be covered under the ppu. Note: 33-10033, being an enlargement claim, could be cut off with 1994 priorities if need be, whereas, those lands could be irrigated until a cut in 1989 priorities if regulation of groundwater occurs under this proposed transfer. If a priority cut occurs, Mr. Romrell can still use his full allotment of water – will just have to cut back number of acres irrigated. I have mentioned the possible withdrawal of 33-10033 to Mr. Romrell in my correspondence but did not get into specifics on it.

I hope this helps in case Mr. Romrell comes into your office wondering ~~what~~ **what** I did.

RE: Water Rights 33-07189, 33-07190, R33-02059, R33-10033 & R33-10988

Dear Mr. Romrell:

In review of your request to revisit the licenses issued on your property in 1995, I found the easiest way to correct your water rights would be through an application for transfer. I have discussed this with Mr. Bryce Contour of our Eastern Regional Office and he thought this would be satisfactory to you.

I have prepared and enclosed an application for transfer form, which will place all of your water rights on your entire farm, with a system capacity of 3.93 cfs as shown on your recommended SRBA claims. Mr. Contour sent me the GIS shape used for adjudication review of Rts. 33-02059 and 33-10033. I then created a shape for the "wedge" shaped piece in the middle of your farm and found an additional 27 acres within this shape finding your entire place of use to be 295 acres. This transfer, once approved, would allow a little more than 0.013 cfs per acre for each of the 295 acres irrigated.

Please note that I have not included your enlargement claim (R33-^{10033 PW}~~10988~~) on this transfer application. I find that the four rights listed on the application form cover your entire farm without the enlargement claim. Once the transfer is approved you may want to withdraw the enlargement claim since your other rights will cover your entire farm.

Please review this transfer application carefully. I have indicated the areas on the form that need to be completed prior to submittal to the Department. If you find that changes need to be made on the application, feel free to make the changes, date and initial any changes made then sign the form in the presence of a notary public. When you submit the application for transfer to the Department it should reflect your water use as you want it to be recorded.

MICROFILMED

JUN 15 2000

The transfer application also includes rights recommended in the SRBA (Snake River Basin Adjudication). Once the transfer application is submitted, if final recommendations have been sent to the SRBA Court, a Notice of Administrative Action will be sent to the court so final action is withheld on your recommended claims until the transfer process is completed.

If you have any questions in regard to this matter, please do not hesitate to contact Mr. Contour or me.

Sincerely,

KAY WALKER
Sr. Water Resource Agent

PART 1

6. General Information:

- a. Description of diversion system Well, pump, mainline to handlines and/or wheel lines.

- b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? _____ Yes _____ No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.

- c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:

None - same land, same system - coverage of "wedge" shaped piece found irrigated
during 1994 exam but not fully covered under licenses issued in 1995.

- d. Remarks:

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

Subject: 33-07189, 33-07190

Mr. Romrell brought in the results of the energy audit. I've dropped a copy in the mail for you. The test was conducted 8/11/1987. Max flow condition was 4.0 cfs @ 65 psi, running 5 wheellines and 5½ handlines.

The derived efficiency seems a little high, which might indicate the measured gpm was high. However, the efficiency is consistent with the efficiencies measured at other conditions and therefore seems to indicate that indeed, the efficiency was good on this pump.

The reported flow also corresponds nicely with nozzle counts. The test doesn't reference it but at that time one line was equipped with 11/64" nozzles, two with 5 gpm flow-control nozzles, and the rest with 5/32" nozzles. Using "rule of thumb" values gives approximately the same result as the test:

1 X 32 X 6 gpm =	192 gpm
9½ X 32 X 5 gpm =	<u>1520 gpm</u>
Nozzle-count total =	1712 gpm = 3.81 cfs.

Because the pump was changed after 1963 I'd still plan to base AJ recommendations on the 1957 documented Q of 3.93. This test however is good supporting documentation.

I don't know what you can do or want to do with licensing recommendations, but since I have the information in hand I thought you ought to see it too.

Thanks, Bryce

Subject: RE: Owen Romrell request

Folding 33-07190 and the wedge-shaped field into the PPU would work very well. The entire farm is under one delivery system, with one owner.

Romrell's request was framed on the original permitted acres, to avoid a request to also submit an amended permit application. 33-07189 was permitted on a PPU basis on all but the wedge, 33-01790 was permitted only on the wedge.

While recommending a PPU would work, recommending per Romrell's request would also work. It would simply "plug the hole" left in the AJ recommendation.

I don't know if it affects the PPU decision, but there is a difference in cfs recommendations. The AJ recommendations are for a combined limitation of 3.92 cfs, based on the 1957 field exam and a 1987 or 1988 energy audit taken with 11 laterals operating. The licenses used 3.45 cfs, based on Keith Wilson's 1994 measurement with 10 lines running.

3.93 per "R" records
Romrell has not filed claims to enjoin the licenses to the Adjudication. Does it matter either way, for your recommendations?

Thank you for your prompt attention. Please contact me again if there are further questions.

Bryce

Subject: Owen Romrell request

Bryce,

I received Owen Romrell's request on Friday. Can you tell me why he has not asked for 33-07190 to be part of the permissible place of use? Is that wedge-shaped parcel under separate ownership now? Please let me know ASAP.

Thanks.

Shelley

Re: Petition for Reconsideration of Preliminary Order, Licenses 33-07189, 33-07190

Dear Mr. Saxton and Mr. Keen:

In reviewing preliminary recommendations for Adjudication Claims 33-02059, 33-10033, and 33-10988, I've become aware of a problem. This letter outlines the fact that the interaction between a pre-accomplished-transfer licensing recommendation and a post-accomplished-transfer adjudication recommendation leaves some of my lands without authorization for irrigation, even though it was the clear intent of the licensing examiner to authorize irrigation.

I have consulted with Bryce Contor of IDWR, who has contacted Harold Jones and Shelley Keen of IDWR. Based on this, I request that licenses 33-07189 and 33-01790 be re-issued as Preliminary Orders, as should have been done when they were originally issued in 1995. This will give me an opportunity to object to the problem that has now become apparent.

I also hereby object to the place of use of the above licenses and petition Idaho Department of Water Resources to reconsider the overlap review. I request that the overlap review be based upon the post-accomplished-transfer Adjudication recommendations.

The following summary and attached maps show the history of the development of this farm and the associated water rights, and the source of the difficulty:

1. License 33-02059 was issued in the 1950's for 225 acres of flood irrigation, as shown on map "A" from the licensing exam. Note that there were 30 acres irrigated in SENW of section 19.

MICROFILMED
JUN 15 2000

2. In 1977, former owner Lamar Thomas converted to sprinkler irrigation. This conversion resulted in an accomplished transfer and enlargement, with the irrigation of lands shown on map "B." Note that the accomplished transfer reduced irrigation in SENW by about 17 acres even though overall acres were enlarged.
3. In 1989, former owner Bryce Contor filed Adjudication Claim A33-02059 reflecting the accomplished transfer, and Claim A33-10033 reflecting the enlargement. These are also shown by map "B."
4. Because the sprinkler system had a greater diversion rate capacity than the licensed 3.2 cfs, in 1989 Mr. Contor filed for permit 33-07189. The permit was filed for 265 acres on a permissible place of use basis, as shown in map "C." The application clearly indicates that Mr. Contor based his application on the accomplished transfer and enlargement reflected in the Adjudication claims.
5. In 1989, Mr. Contor also applied for permit 33-07190 to irrigate 26 acres in SENW and 3 acres in NESW, as shown in map "D." This is the portion of the farm that was not irrigated by Thomas' 1977 sprinkler system, and not claimed in the Adjudication. It is clear that Mr. Contor also based this application on the post-accomplished-transfer situation.
6. I obtained the farm in 1993.
7. In 1994, Keith Wilson of IDWR performed a licensing exam for 33-07189 and 33-07190. Map "E" clearly shows that he found the entire farm to be irrigated, and his overlap review ("F") shows that his intent was to authorize irrigation of the entire farm.
8. Wilson's overlap review considered the pre-accomplished-transfer place of use for license 33-02059.
9. In 1995, licenses 33-07189 and 33-07190 were issued based on Wilson's recommendations. In reviewing the licenses, I did not understand how they would interface with the Adjudication claims, so I did not object at that time. These were not issued as Preliminary Orders, though they should have been.
10. I recently learned that the 1957 licensing exam for 33-02059 found diversion capacity in excess of the licensed rate. Therefore I have filed Beneficial Use Claim A33-10988 for additional diversion rate on the same permissible place of use which was recommended for claims A33-02059 and A33-10033 (map "B").
11. Last month I received the preliminary recommendations for claims A33-02059 and A33-10033, and have been notified of the preliminary recommendation for A33-10988. These were recommended basically as claimed (map "B"). They reflect the accomplished transfer.

MICROFILMED

JUN 15 2000

Licenses 33-07189 and 33-07190 do not reflect the accomplished transfer.

As a result, I am left with only 21 acres of authorized place of use in SENW of section 19 (1 acre under 33-07189, 7 acres under 33-07190, and 13 acres recommended under Adjudication claims). The licensing examiner's finding was that 38 acres were irrigated in SENW, and the clear intent of his overlap review was that 38 acres of irrigation be authorized.

12. In the notice of error process, I brought this deficiency to the attention of Adjudication Agent Allen Ruberry, and suggested he change the recommendations to match Wilson's overlap review and restore authorization for irrigation to the entire farm. Mr. Ruberry explained that as of 1987, the "missing" place of use in SENW of section 19 was in fact not irrigated from the well and therefore cannot be recommended in the Adjudication. Mr. Ruberry is correct that this particular field was not irrigated from the well from the 1977 sprinkler conversion until Mr. Contor made changes after obtaining permit 33-07190.
13. My next approach was to consider a transfer of 33-07189 and 33-07190. Mr. Harold Jones informed Mr. Contor that such a transfer could be problematic because it would appear to be an "unstacking" of rights.

From the above, it is clear that Mr. Contor filed the permit applications in good faith, based on his belief that filing the Adjudication claims had dealt with the accomplished transfer. His intent was to obtain authorization to irrigate the entire farm from the well.

The good-faith intent of IDWR was also clearly to authorize irrigation of the entire farm. In 1994 IDWR was operating with a "legal cloud" over the concept of accomplished transfers. Therefore the department reviewed overlaps based upon the pre-accomplished-transfer status of 33-02059.

Because the outcome of the Adjudication will be a partial decree authorizing the post-accomplished-transfer place of use, and the two licenses (not enjoined to the Adjudication) reflect the pre-accomplished-transfer place of use, the unintended outcome will be that I am "short" 17 acres of place of use.

In retrospect, a formal transfer of 33-02059 should have been filed to reflect the accomplished transfer, prior to the examination of 33-07189 and 33-07190. However, Mr. Contor did not realize, nor did IDWR suggest, that this was needed.

Since all parties have acted in good faith, and since the clear intent of all is the same, please consider this petition. This will allow the licenses to be adjusted to dovetail with the Adjudication recommendations and authorize the use that was clearly intended.

I realize and accept that changing these two licenses may result in changes to Adjudication recommendations for combined diversion rates and combined irrigated acres.

MICROFILMED

JUN 15 2000

The desired outcome for me is authorization to irrigate the entire farm, as recommended by the licensing examiner. The outcome should be:

- 268 acre permissible place of use for 33-02059, 33-07189, 33-10033, and 33-10988, per map "B."
 1. 1952 priority for 3.2 cfs on 225 acres, per 33-02059.
 2. 1957 priority for additional cfs, per 33-10988.
 3. 1977 priority for additional 43 acres, per 33-10033.
 4. License 33-07189 duplicates additional cfs and acres, with priority 1989. While this is a duplicate of Adjudication Claims, I wish to retain the license, as the outcome of the objection process is still uncertain.
- 29 acre place of use for 33-07190 with proportional share of total diversion rate, priority 1989, per map "D."
- Total authorized diversion rate for all rights per system capacity.

I appreciate the willingness of IDWR to consider this situation and explore ways to solve the problem. Please let me know if there is additional information you need to consider or if there is a better way to address these issues.

Thank you,

Owen A. Romrell

RE: POU overlap for rights 33-07189 and 33-07190

=====

These files give a strong indication that the place of use has historically been irrigated from surface water (see the response to our trust water questionnaire). However, when Al Ruberry and I were mapping the Blaine County Canal service area last summer as part of our SRBA review of the area, we found that canal water is not used on this farm and has not been for a few years. I talked with Al today, and he said he currently does not intend to recommend this farm as part of the Blaine County Canal POU. Therefore, we have not included the supplemental groundwater conditions on 33-07189 and 33-07190.

$$Q_{cfs} = \left[\frac{150}{Hp} \times 8.814 \times \frac{0.70}{Eff} \right] \div \left[\frac{114}{Lift} + \left(\frac{66}{psi} \times 2.308 \right) \right]$$

$$Q_{cfs} = \left[\underline{925.47} \right] \div \left[\underline{266.328} \right]$$

$$Q_{cfs} = \underline{3.47} \text{ cfs}$$

Permit 33-07189
~~33-07190~~
RECEIVED
JUL 19 1995

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

Form 2/95

POINT OF DIVERSION OVERLAP REVIEW

33-07189

Permit Number

1. Analysis of Entire System, Current Application Rate per Acre (Qc):
Limit to 0.02 cfs/ac, Permitted Amount, or System Capacity, WHICHEVER IS LESS.

A. Total Number of Acres irrigated = 304.5 acres

B. Total Diversion Rate = 3.45 cfs

Qc = Total Diversion rate [1.B]/Total irrigated acres [1.A] = Current Diversion Rate

$$Qc = \frac{3.45}{302.5} = Qc = 0.011404 \text{ cfs/ac}$$

2. Old Application Rate per Acre = (Qo) from Licensed Flow Rates:

License # 33-02059 @ 3.20 cfs / 225 ac

License # _____ @ _____ cfs / _____ ac

License # _____ @ _____ cfs / _____ ac

$$Qo = \text{Total Lic. Rate} = \frac{3.20}{225} \text{ cfs/ac} = Qo = 0.014222 \text{ cfs/ac}$$

[Old Diversion Rate(Qo) = Licensed Flow Rate/# acres]

3. Comparison of Diversion Rates if:

A. $Qo > Qc$: $Qo(\#2) = 0.014222 \text{ cfs/ac} > Qc(\#1) = 0.011404 \text{ cfs/ac}$
[Old Diversion Rate(Qo) > New Diversion Rate(Qc)]

EXCLUDE LICENSED LANDS . . . GO TO ITEM #4A

B. $Qc > Qo$: $Qc(\#1) = \text{cfs/ac} > Qo(\#2) = \text{cfs/ac}$
[New Diversion Rate(Qc) > Old Diversion Rate(Qo)]

INCLUDE LICENSED LANDS . . . CONTINUE TO ITEM #3.B.1 & 2

1. Additional Flow Rate for Licensed Lands. $Qa = (Qc - Qo) \times (\# \text{ Lic. Ac})$

$$Qa = [(\text{cfs/ac}) - (\text{cfs/ac})] \times (\text{acres}) = Qa = \text{cfs}$$

2. Flow Rate New Acreage. Total Ac. (#1.A) - Lic. Ac. (#2) = New Acres

$$Qn = (Qc) \times (\# \text{ New Ac.}) = \text{cfs}$$

$$Qn = (\text{cfs/ac}) \times (\text{ac}) = Qn = \text{cfs}$$

GO TO ITEM #4B.

JUL 19 1995

4. Calculate Total Flow Rate to be licensed:

A. Rate EXCLUDING Licensed land. Total Ac. (#1.A) - Lic. Ac. (#2) = New Ac.*
(302.5) - (225) = 77.5 ac

$$Qt = Qc(\#1) \times (\# \text{ New Acres}) = 0.011404 \text{ cfs/ac} \times 70 \text{ ac} = 0.80 \text{ cfs}$$

CONDITIONS/REMARKS: *at current rate of diversion only 70 acres can be licensed as permit is for only 0.80 cfs (0.80 cfs / 0.011404 cfs/ac = 70 ac) (70 ac x 0.011404 cfs/ac = 0.798 cfs = 0.80 cfs)

- B. Flow Rate INCLUDING licensed land.

$$Qt = Qa(\#3.B.1) + Qn(\#3.B.2) = \text{cfs} + \text{cfs} = \text{cfs}$$

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 33-07189

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the EASTERN Regional Office in Idaho Falls at (208)525-7161.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 33-07189

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before May 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 33-07189

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed you should complete and submit this form immediately.

Be sure to note the special condition requiring you to install a measuring device. Enclosed, for your reference, is a list of measuring device options.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

This permit authorizes the appropriation of trust water. Trust water is defined as that portion of a particular hydropower water right which exceeds certain minimum stream flows established by state action, and is held in trust by the State of

RECEIVED
MAY 14 1991

Idaho for the use and benefit of the people within the state.
Conditions pertaining to a term review, annual use fee and
jurisdiction of the permit are trust water conditions.

Sincerely,

JIM JOHNSON
Water Rights Supervisor

MEMORANDUM

TO: FILE

FROM: TIM LUKE

RE: APP. NO. 33-7189 & 33-7190/Trust Water Processing

DATE: 3-5-91

The above applications have come up for sequential trust water processing. Based on review of the returned questionnaire and correspondence, the development represented by the applications have been in place prior to 1984. The attached place of use overlap report shows that all of the acreage under the filings was classified as irrigated by the department for the 1986 irrigation season. There was no other available aerial photography available either here at IDWR or at the State SCS office to confirm irrigation prior to October of 1984. The attached report shows that application 33-7189 is largely a supplemental filing. Application 33-7190 represents an expansion of existing rights and uses.

Based on the information submitted by the applicant and the 1986 IDWR data, I would accept the applicants statements concerning development prior to October of 1984. The acreage under the application will not be counted as trust acreage but both applications are considered trust water filings due to the post 1984 priority dates.

Tim Luke
Idaho Department of Water Resources
Statehouse Mail
Boise, Idaho 83720-9000

Dear Mr. Luke:

Enclosed are completed Trust Water Information Questionnaires regarding application number 33-7189 and 33-7190. Questions 2a and 2b refer to past development and irrigation. The following paragraphs should explain that history.

Blaine County Canal Company records indicate that parts of this farm, especially the west half, have been irrigated since the 1920's or before. In 1952 a well was drilled (water right 33-2059) and used with the canal water on 225 acres.

In 1977 sprinklers were installed by a previous owner, but no changes were filed with IDWR. Adjudication claim A33-2059 represents the increased acres under the sprinklers, and permit application 33-7189 represents the increased diversion of water associated with that 1977 change.

The twenty nine acres under application 33-7190 were apparently watered from the 1920's until 1952 with Blaine County Canal Company water. From 1952 until 1977 they were watered with both canal water and well water under 33-2059. In 1977 sprinklers were installed on the rest of the farm and the twenty nine acres have since been irrigated exclusively with canal water.

Application 33-7190 is to add that twenty nine acres to the sprinkler system. My intent would be to be able to pump canal water into the mainline at times and at times to use the well. It does not represent any new acres. Though the flow from the well would be increased, converting from surface irrigation to sprinklers should result in an overall savings in water.

If there are any other questions, please contact me.

Sincerely,

Bryce A. Contor

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
TRUST WATER INFORMATION QUESTIONNAIRE

Application No. 33-7189

INSTRUCTIONS: IF YOU ARE NOT INTERESTED IN HAVING THE APPLICATION PROCESSED, PLEASE COMPLETE AND RETURN THE ENCLOSED WITHDRAWAL FORM.

IF YOU WISH TO HAVE THE APPLICATION PROCESSED, PLEASE ANSWER THE FOLLOWING QUESTIONS AS THOROUGHLY AS POSSIBLE. FAILURE TO RETURN EITHER THE WITHDRAWAL FORM OR QUESTIONNAIRE IS CAUSE FOR THE DEPARTMENT TO VOID THE APPLICATION.

1a. Are you the current owner of the land or place of use described under this application? Yes X No

b. If you are not the property owner, please describe the arrangement enabling you to develop the proposed project.

N/A

2a. Has the source of water listed on this application been used to irrigate any of the land described under this same application prior to October 1, 1984? Yes X No

b. If yes, please describe the extent of development and number of acres irrigated. (Note: Uses developed after October, 1984 are considered trust water diversions and may be subject to certain conditions. You may be asked to verify uses established prior to October, 1984.)

see attached letter

3. If you answered NO to ques #2a, please state the number of acres you have irrigated with this source after October 1, 1984. N/A

4. If you have not irrigated lands under this application, please state the number of acres you plan to complete. N/A

5. If the permit is a supplemental filing please identify other water rights which are used on the same land.

33-2059 and Rights of Blaine Co. Canal Co. incl. 33-00002 and others

Use the reverse side of this form if you wish to add any comments. You may mark changes on the enclosed application to designate any proposed amendments. (Note: Proposed changes which result in an expansion of use will not be considered by the department.)

I hereby assert that the responses provided above are true to the best of my knowledge. I understand that any willful misrepresentations may result in voiding of the application.

Applicant Byron A. Contor

February 26, 1991

RE: APPLICATION FOR PERMIT NO. _____

Dear APPLICANT:

Due to the Swan Falls litigation, Department approval of the enclosed application may have been delayed. The Department is presently reviewing your application and may authorize the proposed development.

The purpose of this letter is to determine: (1) if you are still interested in developing the project, and (2) the extent of development, if any, that has already occurred under the application. Enclosed are two forms requesting information which will help the Department expedite the processing of the application.

1. If you have abandoned or have no interest in continuing with your plans for development of the project, please complete the enclosed withdrawal form and return it to the Department. If you request a withdrawal of the application and the application was not previously advertised, the department will refund your original filing fee.

2. If you wish to continue with your proposed development plans, or have completed all or a portion of the proposed development before October 1, 1984, then you must complete and return the enclosed questionnaire. You may use the questionnaire and enclosed application to make any comments &/or amendments concerning the application. Your completion of the questionnaire will expedite processing and help the department determine if the water diverted under the application is public water or trust water. Approved trust water applications may be subject to additional conditions.

Failure to return either of the above forms within thirty (30) days of the date of this letter is cause for the Department to void the application.

Please be further advised that if any undeveloped portion of your proposed project is greater than 200 acres, or if the application proposes diversion of more than 5.0 cfs, the department will issue a notice requesting additional information as required by Water Appropriation Rule 4,5. (copy enclosed). In particular, rules 4,5,3. through 4,5,3,5. apply to your project if it is more than 200 acres. If necessary, the rule 4,5. information notice will be sent to you after you return the questionnaire.

MAY 14 1991

If you have questions concerning the content of this letter or about completing the forms, please contact Tim Luke at the address below or by calling directly at 327-7864. The enclosed forms and all other relative information must be returned within thirty (30) days to:

Idaho Department of Water Resources
Statehouse Mail
Boise, Idaho 83720-9000
Attn: Tim Luke

Please note that a copy of your application is enclosed. The application number is also shown on the enclosed questionnaire.

Sincerely,

TIM LUKE
Sr. Water Resource Spec.
