CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 3.5 afa per acre for the lands above.

RE: Permit No. 33-07173

Dear Permit Holder(s):

Permit No. 33-07173 is currently being reviewed for licensing. Our review has revealed an issue that you need to address.

The Department's field examiner reported that your irrigation diversion system actually diverts up to 4.07 cfs. However, because Allen Farms, Inc. submitted the Proof of Beneficial Use for 3.0 cfs, the license will be limited to a diversion rate of 3.0 cfs. I have enclosed a copy of the Proof of Beneficial Use for your reference.

If you want your water right license to reflect the 4.07 cfs found by the field examiner, you must submit the additional examination fee of \$50.00 required for a diversion of 4.07 cfs, plus a late payment penalty of \$25.00, within 30 days. If we receive the examination fees after 30 days from the date of this letter, the priority date of your right will be advanced in accordance with Section 42-217 of the Idaho Code.

If you have any questions, please contact me as soon as possible at (208) 327-7946.

Sincerely,

Shelley W. Keen

RE: Assignments of Permit Nos. 33-07173 & 33-07175

Dear Mr. Allen:

In follow-up to our telephone conversation today, this letter is to confirm that there has been an overpayment of the assignment filing fees on the above permits.

The filing fee for each assignment is \$25.00, the total fees for the two assignments is \$50.00.

As you can see on the attached copy of receipt no. C031108, Eastern Idaho Production Credit Association paid \$50.00 in assignment filing fees on August 24, 1994.

Your payment on August 25, 1994, see attached receipt no. C031127, of \$50.00 is a duplication and overpayment of the assignment filing fees.

As you have requested, I have initiated the process to refund to you your receipt no. C031127 in the amount of \$50.00. You will receive your refund under separate cover.

If you have any further questions or require assistance, please feel free to contact me directly at (208) 327-7944.

Respectfully,

Cindy Zimmerman

SUBJECT: Overpayment of Assignment fees

=====

On 8/24/94, Eastern Idaho Production Credit Assn paid the assignment filing fees on the above permits (see receipt #C031108).

On 8/25/94, Allen Farms Inc also paid the assignment filing fees on the above permits (see receipt #C031127) which resulted in overpayment of the filing fees.

In a telephone conversation today with Norman Allen of Allen Farms, Inc., he explained that he recently received billing from Eastern Idaho Production Credit Assn for their payment of the assignment filing fees. Mr. Allen requested a refund of his payment of assignment filing fees (receipt #C031127).

RE: Assignments of Permit No. 33-07173 and 33-07175

Dear Sirs:

I recently received an 'Assignment of Permit' form on the above referenced permits assigning the permits to you.

As of July 1, 1994, the assignment of a permit must be accompanied by a \$25.00 filing fee. Assignment of both the above permits to Eastern Idaho Agricultural Credit Association require a total of \$50.00 in filing fees. Assignments of permits are not acceptable without filing fees.

I am returning the assignments to you, please resubmit the assignments with the filing fees to my attention at the above address.

If you have any questions, please feel free to contact me directly at 327-7944.

Sincerely,

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 33-07173

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the flow measurement port.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

MEMORANDUM

TO: File No. 33-7173
FROM: Gary Spackman *Gary*
DATE: May 15, 1989
RE: Need for additional information under Rule 4,5. of the Water Appropriation Rules & Regulations

I have reviewed application for permit no. 33-7173. The application, as submitted, does not contain the information that is required under Rule 4,5. of the Water Appropriation Rules and Regulations. According to the application, development was complete in 1974 almost 15 years ago.

After my review, however, I have concluded that much of the information required under Rule 4,5. of the Water Appropriation Rules and Regulations will be of little use to the department at the present time. For instance, I believe the purpose of a plat showing the proposed well and any other wells within 1/2 mile radius is to force the applicant to evaluate the effect of his well on other existing rights prior to expending large sums of money. With a well that is already developed, and in place for a long period of time, potential conflicts should probably already have surfaced.

The same reasoning applies submittal of design, construction or operation techniques to protect other users, sufficiency of water supply, financial resources to construct the project, and comments from local government and private interested parties. The length of time that the development has been complete is enough to have raised the issues that we are seeking to address.

As a result, I am not requesting any additional information from the applicant, and propose that the application be approved.

RE: SWAN FALLS PROCESSING

DATE: 11-27-89

=====

This application was among those applications reviewed in the regional offices last year and recommended for out of sequence processing. This application includes a statement and sufficient supporting evidence concerning development of the project prior to October 1, 1984.

The department's Policy and Implementation Plan for Processing Water Rights in the Swan Falls Area provides for applications to be processed out of sequence if the development was completed prior to October 1, 1984 and the application filed prior to July 1, 1985. These filings are not required to be processed in sequence with other trust water filings because the effect of these filings have already occurred and because, due to subordination, the filings are not taking water held in trust. These filings are not subject to the staged development policy and public interest criteria of Section 42-203C, Idaho Code.

Application for Permit No. 33-07173

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned identification No. 33-07173. Please refer to this number in all further correspondence.

This office is currently in the process of advertising the application in the Arco Advertiser. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

RE: APPLICATION FOR PERMIT NO. 33-7173

Dear Applicant:

The department is now beginning the processing of applications which have been held as a result of the Swan Falls controversy. In connection with this processing, the department requests the information described below.

From the department's review of the above referenced water right application, it appears the application is only subject to the usual water right processing described in Section 42-203A, Idaho Code, and is not subject to the public interest criteria processing required of some applications in the Swan Falls settlement.

The department asks that you advise us within 15 days of this letter if you no longer have a continued interest in developing a water right as proposed by the application. If you do not respond in this time period, the department will proceed with the usual processing of the application including advertisement.

Please feel free to contact the department if you have questions.

Sincerely,

Ronald D. Carlson
