Dear Mr. Boyer:

Thank you for your letter of March 28, 1968 on the above referenced permits.

Please be advised that the Department of Reclamation is preparing to license G-30348 for 120 irrigated acres at 2.4 cubic feet per second. We are also preparing to license G-33364 for 55 irrigated acres at 1.10 cubic feet per second. This would allow Mr. Andreason approximately 158 miners inches of extra production in his well. Therefore, pursuant to your request, we have prepared an application for permit to cover his additional ground in section 7 and 18. Please have Mr. Andreason review the application and if it is within his intent, sign and return the application with his filing fees. We are enclosing an instruction sheet to assist you in determining the fees.

You should be advised that it takes approximately 6 weeks to get an application approved. Therefore, we will supply you with a copy of the application when we receive it and return Mr. Andreason's receipt, hoping that this will satisfy the lending institution until such time as the application is approved.

Very truly yours,

Donald W. McEldowney

Dear Mr. Higgenson:

Re: Juel H. Andreason
Permit No. G 33364 &
G 30348

Mr. Andreason who holds the above permits upon which proof has been filed has now acquired additional land adjacent to this land, his well produces sufficient water to allow additional lands to come under this well and he wants to apply for another permit to cover the following lands:

Township 6 N. 29 EBM:

Sec 7:

SE $\frac{1}{4}$ - 2.2 c.f.s for 110 acres (he owns this 160 acres)

Sec. 18

NE $\frac{1}{4}$ - 1 c.f.s for 50 acres (is in process of acquiring this) 160)

His well produces over 400 miners inches or 8 c.f.s, the current permits have appropriated only 4.8 c.f.s. of this, so that 3.2 c.f.s. can still be filed on.

Will you please send a new permit with the above information filled in so that we can get it executed properly.

Sincerely Yours,
