9. Give last date when water was applied to beneficial use LICENSED PLACE OF USE SEPT 1982  
 Length of extension of time requested 2 years, or until 1 Aug 1987  
 (Date)

10. Explain fully your reasons for requesting an extension of time within which to resume the use of your water right and reasons for non-use trying to purchase a new parcel of ground on which the right has been used on occasion. The use of ditches created a large transportation loss that made it more economical to drill a new well (under 33-7063). Also the point of diversion is closer to the new place of use, and right holder will pipe water to the new ground.

SEE ATTACHED TRANSFER & AGREEMENT

I hereby assert that no one will be injured by such extension. The information contained in this application is true to the best of my knowledge.

RE: WATER RIGHT NO. 33-2069

Dear Mr. Williams:

The department has received your letter and statement of resumption of use in connection with the above referenced water right.

The department will consider your statement acceptable that you have resumed the use of 4.0 cfs of water diverted from 2 wells located in the SW1/4SE1/4, Section 8, and NW1/4NW1/4, Section 16, T6N, R29E, BM for irrigation of 200 acres to which the right is appurtenant. The authorized place of use is further described as follows: 40 acre in SW1/4SW1/4, Section 14, 160 acres in the SE1/4, Section 15, all in Twp. 6N, Rge. 29E, BM.

The statement of resumption of use shows that the use of 8.0 cfs has been resumed under the right rather than 4.0 cfs. Since the rate of diversion of right 33-7063 is 4.0 after transfer 3295 was approved on April 22, 1987, the rate can't exceed 4.0 cfs. It is possible that your reference to 8.0 cfs includes in some manner the rate on permit 33-7063 which has been examined and for which a license yet needs to be issued by the department.

Permit 33-7063 provides for the irrigation of 640 acres in parts of Sections 19, 20, 29 and 30, T6N, R30E, BM. The well location for this right is in the NW1/4SW1/4, Section 29, T6N, R30E, BM.

Please feel free to contact the department if you have questions.

Sincerely,

RITA I. FLECK  
Secretary/Records Mgr.

The other in sec 16 GN - Range 29E They are  $\frac{1}{2}$  mile  
apart and approx 2 miles from ground irrigated  
at this time we are flood irrigating and  
it takes a lot of water for a shorter period  
of time, in the event we sprinkle some  
time in the future I feel 4ft of water  
would be adequate. We have an agreement  
with the owners of the land and are still negotiating  
buying it which we have to get accomplished  
in the near future. I don't know why these  
wells were filed on one license, My papers show  
33-2069 also (G-23041) there was also  
a third well with a claim of 3.4 CFS between  
these two wells No. 33-4001 which caved in and  
has not been used for several years. We will be  
using these wells again this year and will let  
you know of our intent in the future

Kirth explained that the extension of time was filed first to insure that the record showed the right as not being lost thru non-use. The transfer application was filed after the extension filing and proposed to reduce the right. Therefore the right after the transfer is approved will be used as shown and will only use 40 cfs \_\_\_\_\_

RE: Application for transfer of license 33-2069.

In Aug, 1983 Keith Wilson performed the licensing field exam on permit 33-7063. The examination revealed 640 acres were being irrigated from a well adjacent to the property.

While preparing the final write up of the beneficial use field report Keith discovered that license 33-2069 was appurtenant to 247 acres of the permitted place of use. Subsequent discussions with the permit holder revealed the wells under license 33-2069 had not been used to irrigate this 247 since 1982. Mr. Williams had discontinued the use of the wells because transmission losses were excessive and it was economically more feasible to pump from the well under permit 33-7063.

To resolve questions concerning loss of license 33-2069 thru non-use and conditions on permit 33-7063 due to the overlapping of the two rights, Mr. Williams elected to initiate this application for transfer of license 33-2069. The license could then be utilized on lands considerably closer to the licensed points of diversion.

Dear Mr. Bosch:

This office represents Hope Land & Water Co., Inc., an Idaho corporation, and Mr. W. T. Williams, a resident of Twin Falls County, Idaho. We are presently reviewing the water rights owned by Mr. Williams and the corporation and would appreciate your advice in regard to any well permits in either the name of the corporation or Mr. Williams that still need proof to obtain a water license. The records of Mr. Williams are incomplete, but he appears to have water license number G-23641 and 20569 but has not submitted proof on permit number G-26687 and 20655. Your records may reveal additional permits on which proof should be submitted.

We will appreciate your advice in regard to the steps necessary to be taken on the two permits that we have mentioned in the paragraph above. We will also appreciate advice in regard to what your records show as the status of all licenses and permits in the name of Hope Land & Water Co., Inc., or W. T. Williams.

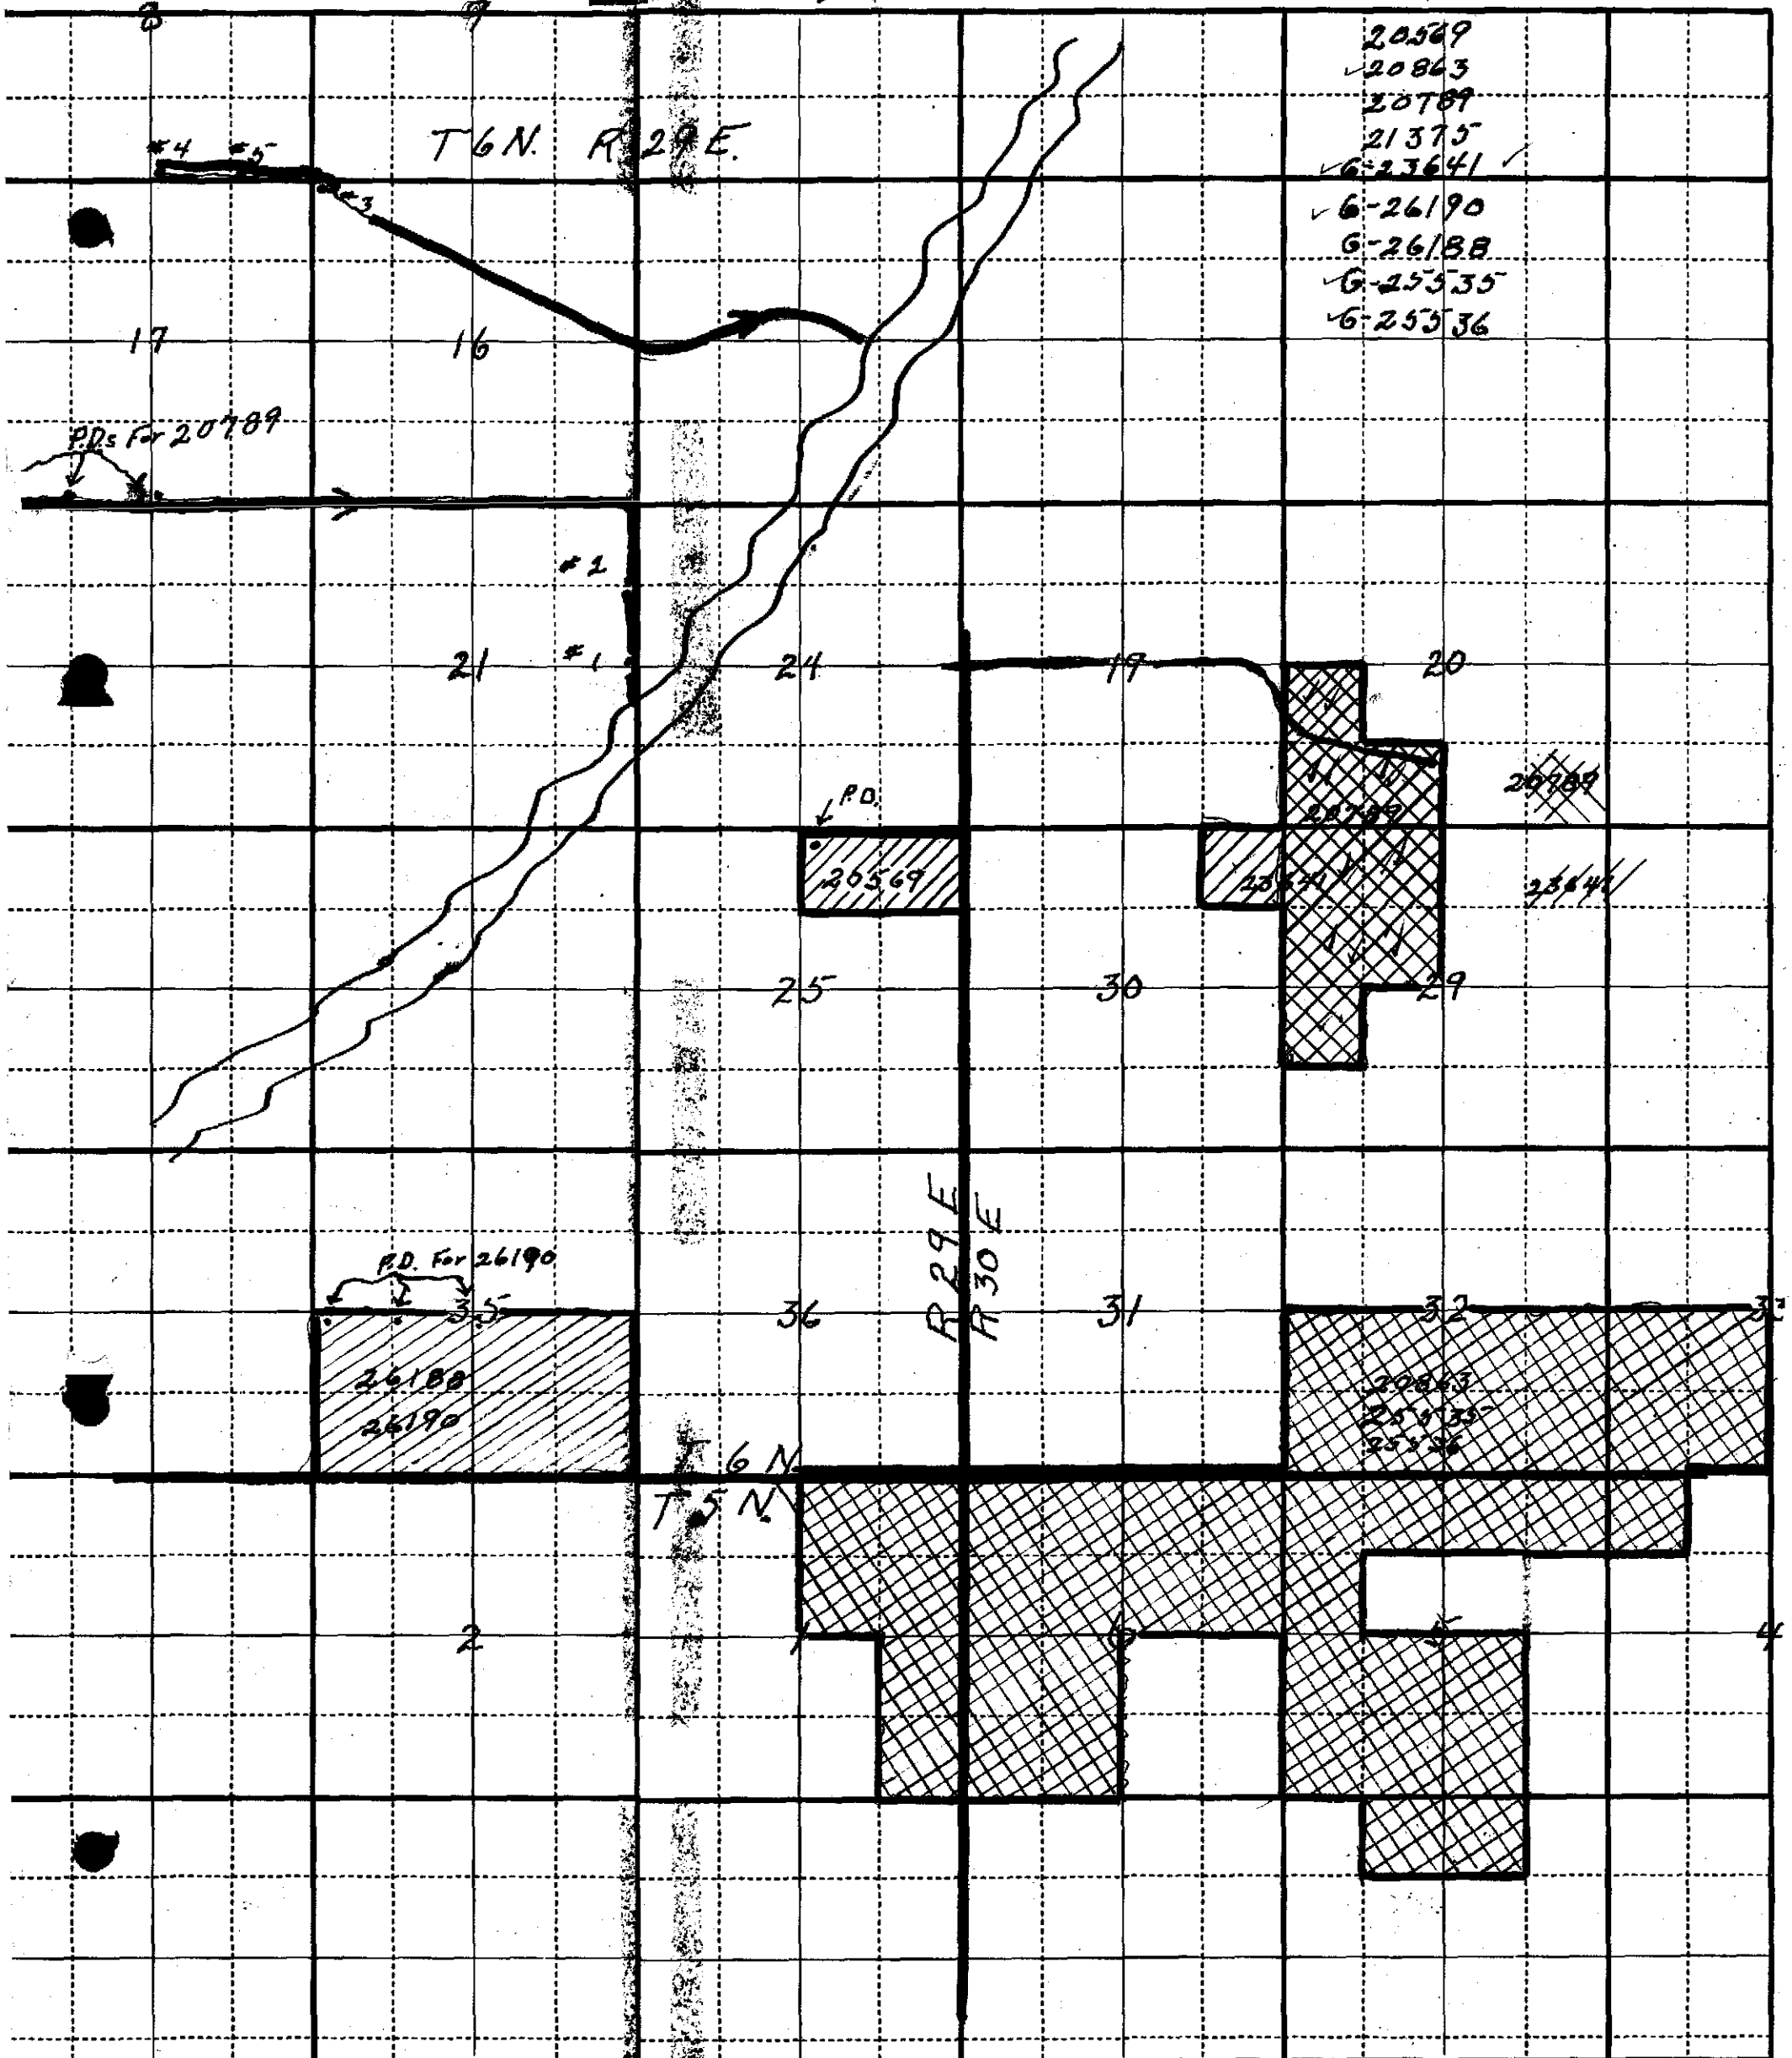

Sincerely,

Re: Permit Nos. G-23641  
and 20789

Mr. Dan True  
1054 Blue Lakes Blvd.  
Twin Falls, Idaho

Dear Mr. True:

In checking, we find in regard to licensing No. G-23641 that the same land except for one forty (NE $\frac{1}{4}$ NE $\frac{1}{4}$  of Section 30), is covered under Permit No. 20789.

It will, therefore, be impossible to license it under No. G-23641 without first amending the land list under No. 20789.

In case you wish to do this, I am enclosing a blank form on which to make application for transfer in place of use.

After this has been done, it will then be possible to bring No. G-23641 to license.

It may be you can make an amendment under No. G-23641 to include about 33 acres more land; otherwise, the license will not cover all the water being pumped.

If you wish to come to the office and discuss this or go to the farms and make an inspection, we will be glad to accompany you and help you in any way possible.

Yours truly,

STATUS OF HOPE LAND & WATER CO., INC. PERMITS

DECEMBER 14, 1956

E. N. HUMPHREY

20370 J. Edw. True.

Permit  
No.

20589

6

Dan True refers to this permit in his letter to this Department written Dec. 11, 1956.

Completion of Works have been made.  
Beneficial Use proofs were due July 31, 1954, but have not been made.

20789

An extension of time was granted.  
Completion of Works proof has been made.  
Beneficial Use proof is due December 18, 1957.

20863

This is a large filing that is only partly developed.  
An extension for completion of works was made on February 4, 1954.  
Completion of Works was made in May, 1955.  
Inspection was made.  
Certificate for Completion of Works has never been issued.  
It can be issued for an amount of 416 inches.  
In February, 1956, point of diversion was amended to drop out Well No. 3, which produced 180 inches, on the date of inspection September 2, 1955. Since these changes have been made; probably the best thing to do is issue a completion of works for 236 inches.  
Beneficial Use due in May, 1957.

G-23641

Well No. 3 that was dropped from Permit No. 20863 has been included in this permit.  
Proofs are all okay.  
Completion of Works can be issued for amount of filing or 4.8 c. f. s.  
Delivery from the two wells was 360 inches on Sept. 2, 1955.

Lands irrigated (that are covered in permit):

T. 6 N., 30 E., Section 20; SW  $\frac{1}{4}$  SW  $\frac{1}{4}$  = 40 Acres  
SE  $\frac{1}{4}$  SW  $\frac{1}{4}$  = 25 Acres  
NW  $\frac{1}{4}$  NW  $\frac{1}{4}$  = 0 Acres

Section 29; NE  $\frac{1}{4}$  NW  $\frac{1}{4}$  = 37 Acres  
NW  $\frac{1}{4}$  NW  $\frac{1}{4}$  = 40 Acres  
SW  $\frac{1}{4}$  NW  $\frac{1}{4}$  = 20 Acres  
SE  $\frac{1}{4}$  NW  $\frac{1}{4}$  = 10 Acres  
NW  $\frac{1}{4}$  SW  $\frac{1}{4}$  = 0 Acres

Sec. 30, NE  $\frac{1}{4}$  NE  $\frac{1}{4}$  = 35 Acres

207 Acres

License for 207 inches can be issued.

23641

G-26188 New filing this year.  
Proofs due in 1961.

G-28190 New filing this year.  
Proofs due in 1961

G-25535 New filing last year.  
Proofs due in 1960.

G-25536 New filing last year.  
Proofs due in 1960.

See # 26183

There is still no permit that includes the well in the SE $\frac{1}{4}$ SE $\frac{1}{4}$   
of Section 8, T. 6 N., R. 29 E.  
Possibly G-26188 is meant to, if so there should be an amend-  
ment.

There appears to be additional lands irrigated that are not  
included in any of these permits. They are as follows:

T. 6 N., R. 30 E. Section 19; SE $\frac{1}{4}$

Section 30; NW $\frac{1}{4}$ NE $\frac{1}{4}$ , SW $\frac{1}{4}$ NE $\frac{1}{4}$ , SE $\frac{1}{4}$ NE $\frac{1}{4}$

T. 6 N. R. 29 E. Section 25; S $\frac{1}{2}$ NE $\frac{1}{4}$

23641

Certificate License No. 23641  
Hope Land & Water Co. Inc.

G-23641 Same land except NE<sup>1</sup>/<sub>4</sub> NE<sup>1</sup>/<sub>4</sub> 30 T6N R30E 18W  
is covered by Permit No 20789 which has a  
priority of 12/6/48 and on which 4th Certificate  
has been issued for 6.11 cfs B.W. due Dec 1957

License under G-23641 can not be issued  
unless P. # 20789 is amended to change  
land list to clear for G-23641.

Mr. E.N. Humphrey

Boise, Idaho

Dear Mr. Humphrey:

In reference to your letter of December 5, I am taking the privilege of answering it for my dad. I have been trying to learn the set up of Hope Land & Water Company so as to relieve some of the detail for my dad and in doing so I uncovered Permit No. G-20569, which I thought to be the only permit covering the ground described as the  $N\frac{1}{2}$  NE $\frac{1}{4}$  Sec.25 T.6N, R.29EBM.

Since the time I was in Mr. Kulp's office asking about this particular land and the permit appretaining there to, I have found this land is covered in Permit No. G-23641 and the other permit has been left by the way side.

It is my opinion that this is the confusion, which has arisen concerning the above permit. If not, please don't hesitate to drep me a line, and I'll try in a farmer fashion to clear the matter up for you.

I believe your examination of the ground was the only thing lacking before final action could be taken on the above permit.

Yours truly,

Dear Mr. True:

We have placed on file the depositions of Hope Land & Water Co., Inc. and two witnesses, also affidavit of publication in the Arco Advertiser, all submitted in proof of completion of works and beneficial use on Permit No. G-23641.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Dear Roy:

Re # G-23641

Attached are the proof papers and Affidavit from Lyle Frazier. Trust you will find these in order.

I don't believe we can ask that you complete more than the "Completion Of Works" at this time because we have not actually used this water on the full 320 acres it is now applied to. We have used all of our water from these pumps and others for three years on this and other land but as I understand it beneficial use would mean use on the lands under the present amended permit.

We will get the bulk of that specific 320 under irrigation this season and then the use proof could be made unless what I have outlined above qualifies. We do not want to ask for any thing which isn't strictly allowable under your regulations as you know.

Thank you for all your cooperation on this matter Roy.

Cordially,

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Martin W. Wegener, 49, 181 Van Buren St., Twin Falls, Idaho - Farmer

Ques. 2. Are you acquainted with Hope Land & Water Co., Inc., the holder of Permit No. G-23641? How long have you known him and where does he reside?

Ques. 3. Have you read or heard read said Permit No. G-23641, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Water pumped by electric turbine from drilled wells. Location #4 is SWcorner SW $\frac{1}{4}$ SE $\frac{1}{4}$  Sec. 8., and #3 in NW corner NW $\frac{1}{4}$ NW $\frac{1}{4}$  Sec. 16., both in Twp. 6 N., Range 29 E. B. M. Butte County, Idaho. A ditch with capacity over 400" runs from the wells to the land in an easterly direction.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. Ditch would carry 400" or more. I have seen over 300-325" so conveyed.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. Each pump will produce around 160"--total for both 320". I judge the volume by experience with irrigation streams and pump capacities.

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. The land is a silt loam. 1" to the acre is needed at the pumps in order to deliver around 3/4" on the land. This will raise fine crops.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No. I have worked as a hired employee on the place.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I have seen crops raised on over 100 acres. This during the past three years. Will farm the entire piece this year.

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. George Voss 62, 151 Ramage St., Twin Falls, Idaho Farm Worker

Ques. 2. Are you acquainted with Hope Land & Water Co. Inc., the holder of Permit No. G-23641? How long have you known him and where does he reside?

Ans. Five or Six years. 1964 Filer Ave East. Twin Falls, Idaho

Ques. 3. Have you read or heard read said Permit No. ~~xxx~~ G-23641, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Deep wells pumped by electric Turbine pumps. Wells located as follows: 1 in SW corner SW $\frac{1}{4}$  SE $\frac{1}{4}$  Sec 8., and one in NW corner NW $\frac{1}{4}$  NW $\frac{1}{4}$  Sec. 16., both in Twp 6 N., Range 29 EBM, Butte County, Idaho. A ditch runs on grade generally easterly from the wells to the land. It will convey 400" or more.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. Ditch will convey over 400". I have seen 320 to 350" conveyed.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. Believe each pump will deliver at least 160"--total 320" or more. I estimated the flow since I am familiar with irrigation streams and feel I can judge them with fair accuracy.

*23641*

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Used for Irrigation. Land is S<sup>1</sup>/<sub>4</sub>SW<sup>1</sup>/<sub>4</sub>, NW<sup>1</sup>/<sub>4</sub>SW<sup>1</sup>/<sub>4</sub> Sec. 20 and NW<sup>1</sup>/<sub>4</sub>, NW<sup>1</sup>/<sub>4</sub>SW<sup>1</sup>/<sub>4</sub> Sec. 29 all in Twp. 6 N., Range 30 E. B. M. Butte County, Idaho. 320 acres in all. However, presently irrigated are only about 25 acres in Sec. 20 and 100 acres in Sec. 29. I understand the rest of the land will be irrigated during the season of 1956. All irrigated land was desert and is now fenced and ready to farm a forth season.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what etxent.

Ans. \_\_\_\_\_

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. The land is a silt loam. I believe profitable cultivation can be done with 3/4" to the acre. This will require about 1" to the acre at the source because of ditch losses.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. None whatever. I have been hired to irrigate this land in 1955 season.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I have seen crops grown on more than 100 acres of this land and have myself irrigated most of this land with the water from these wells.

Dear Mr. True:

You will probably think the Writer is careless as I forgot to have you sign the enclosed Amendments for change in point of diversion and place of use. Please sign the Amendments and return to this Department.

Evidently too much confusion around here when you came back to the Office in the afternoon.

We also wish to state that we are unable to furnish you Licenses for Permits Nos. 20863 and G-23641 for the reason that when Mr. Humphrey inspected your wells he only inspected them for Completion of Works and did not inspect the land where the water was used, therefore, it will be necessary for him to make another inspection on Beneficial Use proof.

This inspection can be made after you complete Permits Nos. G-23641 and 20863.

For the purpose of satisfying the Bureau of Land Management on your Desert Land Entries, we are wondering if it would not suffice to furnish the Land Office with a copy of the Amended Permit No. G-23641 in place of a copy of the License which we are now unable to furnish.

Please advise us accordingly.

Dear Mrs Anderson,

Thank you for your letter of Jan. 27th.

Believe the attached new maps will give you the information needed.

As you can see, there are two routes by which we may take the water from the wells to the land upon which it will be used. In both cases it will be mingled with waters already being transported in the ditches so that the loss will only be proportionate.

We are at present pumping two wells on the rights of way shown in red and intend to add at least two more this spring. Also we have canal water running thru these ditches too.

Hope the above explanation will make the application clear to you.

Kind regards to all of you.

We acknowledge receipt of the application of the Hope Land & Water Company for permit to appropriate 4.8 second feet of water from two wells located in Section 8, Township 6 North, Range 29 East, B.M., accompanied by your check for the \$6.00 filing fee.

We note that you describe the land as the N $\frac{1}{2}$  NE $\frac{1}{4}$  Section 25, and NE $\frac{1}{4}$  Section 30, Township 6 North, Range 29 East, B.M. We think this is an error as Section 30 is evidently located in Township 6 North, Range 30 East, B.M., and with your permission we shall correct the application accordingly.

However, your sketch map does not show the location of the wells and we return same with the request that you indicate on the lower part of the sketch map just where these wells are to be located.

Very truly yours,

Trust these are made out in acceptable manner.

Also want to thank you for your letter of the 23rd which I found upon my return from California last nite in which you have reminded me about proofs on permit #20369. I will see that the papers are mailed tomorrow.
