TRANSFER NO. 5650
WATER RIGHT NO(S). 33-02059/33-07189/33-07190/33-10988

CONDITIONS OF APPROVAL AND REMARKS

1. After specific notification by the department, the right holder shall install a suitable measuring device or shall enter into an agreement with the department to determine the amount of water diverted from power records and shall annually report the information to the department.
2. This right when combined with all other rights shall provide no more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
3. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
4. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
- *** 5. Right 33-02059 is limited to the irrigation of 225.0 acres in the place of use described above in a single irrigation season.
- *** 6. Right 33-10988 is limited to the irrigation of 225.0 acres in the place of use described above in a single irrigation season.
- * 7. Rights 33-02059 and 33-10988 when combined shall not exceed a total annual maximum diversion volume of 787.5 af at the field headgate and the irrigation of 225.0 acres.
- *** 8. Right 33-07189 is limited to the irrigation of 70.0 acres in the place of use described above in a single irrigation season.
- *** 9. Right 33-07190 is limited to the irrigation of 10.5 acres in the place of use described above in a single irrigation season.
10. Rights 33-02059, 33-07189 and 33-07190 when combined shall not exceed a total diversion rate of 3.45 cfs.
- ** 11. Rights 33-02059, 33-10988, 33-07189 and 33-07190 when combined shall not exceed a total diversion rate of 3.93 cfs, a total annual maximum diversion volume of 1032.5 af at the field headgate, and the irrigation of 295.0 acres.
12. Rights 33-02059, 33-10988, 33-07189 and 33-07190 when combined with Right 33-10033 shall not exceed a total diversion rate of 3.93 cfs, a total annual maximum diversion volume of 1032.5 af at the field headgate, and the irrigation of 295.0 acres.
13. Pursuant to Section 42-1412(6), Idaho Code, Rights 33-02059 and 33-10988 are subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
14. Use of ground water under Rights 33-02059 and 33-10988 is combined with water from Blaine County Canal Co.

TRANSFER NO. 5650
WATER RIGHT NO(S). 33-02059/33-07189/33-07190/33-10988

CONDITIONS OF APPROVAL AND REMARKS

15. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with ground water diverted under Rights 33-02059 and 33-10988 and shall only divert ground water under these rights when water from the appurtenant surface water rights cannot be delivered to the right holder.
16. If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, Rights 33-02059 and 33-10988 to divert ground water shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
17. The period of use for the irrigation described under Rights 33-07189 and 33-07190 may be extended to a beginning date of 4/1 and an ending date of 10/31 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/15 and after 10/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.
18. Rights 33-07189 and 33-07190 are for the use of trust water and are subject to review 20 years after the issuance of the permit to determine availability of water and to re-evaluate the public interest.
19. Diversion and use of water under Rights 33-07189 and 33-07190 are subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.
20. The Director retains jurisdiction of Rights 33-07189 and 33-07190 and may change, add, or remove any requirement as determined to be appropriate.

RE: TRANSFER OF WATER RIGHTS 33-02059/33-07189/33-07190/33-10988
(Transfer 5650)

Dear Water Right Holder(s):

Enclosed is the copy of your approved Transfer of Water Rights for the above referenced water rights (Transfer 5650). Please be sure to thoroughly read the Conditions and Remarks listed on the transfer. Also, please be advised that the accompanying transfer approval should be considered and treated as a **preliminary order** of the department issued pursuant to section 67-5243, Idaho Code. Enclosed are instructions for responding to **Preliminary Orders** if you are in disagreement with the approved transfer.

Please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address of the owner of a water right to the department. Notice of the change must be provided to the department within 120 days of the change. Change reporting forms are available from any office of the department.

Please feel free to contact the department if you have questions.

Sincerely,

Janula S. Skaggs

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Re: Transfer prepared for Owen Romrell (33-02059, 33-07189, 33-07190, 33-10033 and 33-10988)

.....

I have prepared a transfer application for Owen Romrell to cover his entire farm with a ppu and correct errors made between licenses issued in 1995 and SRBA accomplished transfer recommendations. I am sending the transfer application out to Mr. Romrell today and wanted to let you know what my thinking was while preparing it. Shelley and I discussed this situation with Norm – amending the two licenses or "unstacking" rights with a transfer application. Norm preferred the latter so this is how I proceeded.

I have included four of Mr. Romrell's rights under the transfer. Shelley found the enlargement claim would be of dubious value once the transfer is approved. His determination was made using the following:

33-02059	225 acres	3.20 cfs	}	225 acres @ 3.93 cfs = 0.017 per ac	
33-10988	225 acres	0.73 cfs			
				+	
33-07189	70 acres	0.80 cfs	}	70 acres @ 0.92 cfs = 0.013 per ac	
33-07190	10.5 acres	0.12 cfs			
				295 acres @ 3.93 cfs = 0.013 per ac	

33-10033 was not included since lands will be covered under the ppu. Note: 33-10033, being an enlargement claim, could be cut off with 1994 priorities if need be, whereas, those lands could be irrigated until a cut in 1989 priorities if regulation of groundwater occurs under this proposed transfer. If a priority cut occurs, Mr. Romrell can still use his full allotment of water – will just have to cut back number of acres irrigated. I have mentioned the possible withdrawal of 33-10033 to Mr. Romrell in my correspondence but did not get into specifics on it.

I hope this helps in case Mr. Romrell comes into your office wondering why I did what I did.

RE: Water Rights 33-07189, 33-07190, R33-02059, R33-10033 & R33-10988

Dear Mr. Romrell:

In review of your request to revisit the licenses issued on your property in 1995, I found the easiest way to correct your water rights would be through an application for transfer. I have discussed this with Mr. Bryce Contour of our Eastern Regional Office and he thought this would be satisfactory to you.

I have prepared and enclosed an application for transfer form, which will place all of your water rights on your entire farm, with a system capacity of 3.93 cfs as shown on your recommended SRBA claims. Mr. Contour sent me the GIS shape used for adjudication review of Rts. 33-02059 and 33-10033. I then created a shape for the "wedge" shaped piece in the middle of your farm and found an additional 27 acres within this shape finding your entire place of use to be 295 acres. This transfer, once approved, would allow a little more than 0.013 cfs per acre for each of the 295 acres irrigated.

R33-10033

Please note that I have not included your enlargement claim (~~R33-10988~~) on this transfer application. I find that the four rights listed on the application form cover your entire farm without the enlargement claim. Once the transfer is approved you may want to withdraw the enlargement claim since your other rights will cover your entire farm.

Please review this transfer application carefully. I have indicated the areas on the form that need to be completed prior to submittal to the Department. If you find that changes need to be made on the application, feel free to make the changes, date and initial any changes made then sign the form in the presence of a notary public. When you submit the application for transfer to the Department it should reflect your water use as you want it to be recorded.

RECEIVED
JUL 13 2000

The transfer application also includes rights recommended in the SRBA (Snake River Basin Adjudication). Once the transfer application is submitted, if final recommendations have been sent to the SRBA Court, a Notice of Administrative Action will be sent to the court so final action is withheld on your recommended claims until the transfer process is completed.

If you have any questions in regard to this matter, please do not hesitate to contact Mr. Contour or me.

Sincerely,

A handwritten signature in black ink that reads "Kay Walker". The signature is fluid and cursive, with the first name "Kay" and last name "Walker" clearly distinguishable.

Re: Licensing Review

Kay Walker has contacted me with Allocation's decision to deal with the overlap problem by allowing Romrell to file a transfer combining all the rights into a permissible place of use. I have reviewed the proposed transfer application and it appears to be compatible with the adjudication claims.

Kay's letter to Romrell indicates that the transfer will effectively supercede enlargement claim A33-10033, with a superior priority, and then inadvertently suggests that Romrell withdraw claim A33-10988.

A33-10988 is not an enlargement claim and should not be withdrawn. Once the transfer is approved, Romrell could withdraw claim A33-10033 without harming himself. It would probably be unwise to withdraw it any sooner.

Mr. Harley M. McDowell
P. O. Box 2161
Boise, Idaho

Dear Mr. McDowell:

Our field engineer's report on the inspection of the completion of construction work and application of water to beneficial use under the terms of Permit No. G-22774, Wendell Hansen, Howe, Idaho, shows that his well is capable of conveying 160 miner's inches (3.2 c.f.s.) of water for irrigation of 225 acres. This permit is now entitled to the Certificate of Completion of Works and the License and Certificate of Water Right.

Upon receipt of the statutory fees, total of \$21.00, we will issue to Mr. Hansen the Certificate of Completion of Works (for which the fee is five dollars) and the License (sixteen dollars—based at the rate of two dollars for each 40-acre subdivision) confirming the right with priority of May 16, 1952, to his use of 3.2 second feet of subterranean water with the point of diversion in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 19, for irrigation of 225 acres in the N $\frac{1}{2}$ of Section 19, Township 6 North, Range 29 East, B.H.

NOTICE OF PROOF OF COMPLETION OF WORKS AND

APPLICATION OF WATER TO BENEFICIAL USE

Notice is hereby given that at 10 a.m., on the 29th day of December, 1956, at Boise, County of Ada, State of Idaho, before Harley M. McDowell, Notary Public, proof will be submitted of the completion of works for the diversion of 3.2 cubic feet per second of underground waters from a well, and of the application to beneficial use of said water, in accordance with the terms and conditions of Permit No. G-22774 heretofore issued by the Department of Reclamation of the State of Idaho.

1. The name and postoffice address of the person or corporation holding said permit are Wendell Hansen, Howe, Idaho.

2. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conveying to the place of use is 3.2 cubic feet per second.

3. The use to which said water has been applied is irrigation purposes, and the amount applied to beneficial use is 3.2 cubic feet per second.

4. The point of diversion of said water is NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 19, T 6N-R 29E., B. M.

5. The place where said water is used is N $\frac{1}{2}$, Section 19, T 6N-R 29E., B. M.

6. The date of priority which said user is prepared to establish is 5-16-52.

Permit No. G-22774

Proof of Application of Water to Beneficial Use

Deposition of Holder and Completion of Works

Ques. 1. State your name, residence, occupation and postoffice address.
Ans. My name is Wendell Hansen. Residence is 4 miles North of Howe, occupation is farming, and livestock, P. O. Address is Howe, Idaho.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.
Ans. Acting as an individual

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.
Ans. The number of the permit is G-22774, date of the permit is May 23rd, 1952 and the date of priority I propose to establish is May 16th, 1952.

Ques. 4. State source of water supply and give exact location of point of diversion.
Ans. Drilled well, and the point of diversion is NW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 19, T 6 N - R 29 E.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.
Ans. Dug well, cemented, approximately 6' across for the first 95 feet; then I have 20" casing for 40' but I have lined this with 16" casing for another 60' and this stands about 4 or 5' from the bottom of the well. The whole depth would be around 160'. I have 75 h.p. turbine type pump and motor and the well will discharge 200" of water. I state this discharge and estimate from my knowledge in having seen water measured and knowing what pumps of this type will produce. Everything is by gravity and nothing is by sprinkler.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.
Ans. Purpose of this water is for irrigation and I irrigate 225 acres here. I irrigate all the entire N $\frac{1}{2}$ except a small part in the NW $\frac{1}{4}$ NW $\frac{1}{4}$, then there is some acreage in the NE $\frac{1}{4}$ NE $\frac{1}{4}$ that I don't irrigate and a little bit in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ and a few acres in the SE $\frac{1}{4}$ NE $\frac{1}{4}$. There is no natural meadow and all the land has been cultivated as a direct result of this improvement that I have made here. I have spent \$10,000.00 here in improving this land, as a direct result of this irrigation use.

22774

RNT

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. Only for irrigation.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. The minimum amount of water that I could get by with here is 220" and I have used as much and put it on the land since 1953.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. I am the same person who made application for this permit.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. This water has been used on the land since 1953 every summer. I know that this well is producing around 220" and I have every year put that much water to beneficial use on the 225 acres of land here during that period, irrigating continuously, every season.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. I do have one other high water right which is not sufficient to raise an agricultural crop and cannot be depended upon. This was under the old Carey act and you just can't farm with this water. It cannot be practically applied on the land or depended on.

Permit No. G-22774

Proof of Application of Water to Beneficial Use

Deposition of Witness and Completion of Works

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. My name is Lawrence R. Hawley, age is 40, residence is 5 miles north of Howe, Idaho, occupation is farming, livestock, P. O. Address is Howe, Idaho.

Ques. 2. Are you acquainted with Wendell Hansen, the holder of Permit No. G-22774? How long have you known him and where does he reside?

Ans. I have known him for 30 years and know that he lives 4 miles north of Howe, Idaho

Ques. 3. Have you read or heard read said Permit No. G-22774, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. The source of water supply here is a drilled well, to raise subterranean water, and the point of diversion is NW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 19, T 6 N - R 29 E.

The works consist of a dug well, approximately 160' deep, this is equipped with 75 h.p. pump and motor and will discharge 220" of water. This is by gravity.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. It is adequate to convey up to 300" of water. I feel this would produce 220" of water and the works will convey it.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. I feel this will produce 220" of water and this is based on my knowledge of seeing wells measured and measuring water in this vicinity.

22774

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Used for irrigation. In the NW¹₄ 130 acres are irrigable (this is on his deeded land) and in the NE¹₄ about 115 acres are irrigable. This is all cultivated land no natural meadow, and I figure he has spent more than \$10,000.00 in working up this land and all the improvements here are a direct result of the water.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. This is only for irrigation.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. The land here is spotted. There is some real good land, it is a light loam with some spots of pea gravel and I figure he needs at least all the water he has been producing here for this.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. I know from my own knowledge that he has irrigated this since 1953 and has put the 220⁺ over the land during all that time every season.

NO.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I go right by this several times every day during the cropping season and I am very familiar with it since the entire period it has been developed.

Lawrence P. Hawley

I hereby certify that the foregoing testimony was read to the above subscriber before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me in Boise, County of Ada, State of Idaho, on this 29th day of December, A. Permit No. G-22774.....

Proof of Application of Water to Beneficial Use
Deposition of Witness and Completion of Works

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. My name is Clyde Lee, age is 44, residence 4 miles north of Howe, Idaho,
occupation is farming and P. O. Address is Howe, Idaho.

Ques. 2. Are you acquainted with Wendell Hansen, the
holder of Permit No. G-22774? How long have you known him and where does
he reside?

Ans. I have known him 8 years and know that he lives 4 miles north of Howe, Idaho.

Ques. 3. Have you read or heard read said Permit No. G-22774, and are you
familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for con-
veying water from point of diversion to place of use.

Ans. The source of the water is from a drilled well in NW¹ NW⁴ Section 19, T 6 N -
R 29 E. and the works consist of a drilled well with a depth of 160'. This is
equipped with a 15 h.p. pump and motor and will discharge around 220" of water.

Ques. 5. How many second feet of water do you estimate said works will safely con-
duct to place of use, and how much water have you seen being so conveyed?

Ans. I estimate the works will produce 220" of water safely to the place of use and I
have seen this conveyed.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons
per minute have you seen the pump deliver, and how did you measure or estimate the
amount?

Ans. I have seen the pump deliver 220" of water and I estimate this from my knowledge
of having seen water delivered and measured.

22774

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. For irrigation on 130 acres in NW $\frac{1}{4}$ and 115 acres in NE $\frac{1}{4}$ of Section 19
This is all cultivated land and there is no natural meadow and the improvements here have all been as a direct result of this use.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. Irrigation only.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. The soil here is a loam soil and has spots of pea gravel and I have seen this whole 220" applied on this land since 1953 when it was first developed and in my opinion he could not get by with any less water.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. This is right on the highway and I have a ditch in this same area, so I have seen it almost every day during the irrigation season since 1953 and I know that this water has been applied to the land, to raise an agricultural crop.

(Signed) Clyde Lee

I hereby certify that the foregoing testimony was read to the above subscriber before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me in Boise,
County of Ada, State of Idaho, on this 29th day of December,
A. D. 1956.

Department of Reclamation

**To Permit to appropriate the Public Waters
of the State of Idaho, No. G-22774**

Comes now Mandall Hansen, and represents to the State Reclamation Engineer of the State of Idaho.

That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho, No. G-22774, and requests that the list of lands to be irrigated, as described in said permit, be changed to read as follows:

N¹, Section 19, T. 6 N. - R. 29 E., S. 14.

making a total of 320 acres.

That an additional amount of water is not asked for, and that the rights of others will not be adversely affected by such change.

Signed at Boise, this 15 day of November, 19 56
