Dear Mr. Allen:

The information we have received is not sufficient to justify a diversion rate of more than one cubic foot per second, for each fifty acres of land, as you have requested by the transfer of License No. 33-2047.

Since the 200 acres of land to which you wish to transfer License No. 33-2047 is presently covered by two licensed rights, the maximum rate of diversion for which this transfer can be approved is 0.86 cubic feet per second.

If we do not receive further justification of the excessive rate of diversion within 30 days, we will assume you have no objections to the reduction, and final action will be taken on your transfer application.

I contacted Mr. James Stalmaker of SCS and he said it was his opinion that Norman Allen needed more than one-inch per acre. Mr. Stalmaker said Norman Allen uses surface irrigation and has some runs that are over $\frac{1}{4}$ -mile on soil that has a high infiltration rate. However, Mr. Stalmaker was unwilling or unable to give a quantilative estimate of the amount of water needed.

I recommend that instead of reducing the "Q" on this application we restrict the annual volume to 3.0 acre feet per acre.

Mr. Norman Allen asked me to write a letter concerning water-right #33-2047.

Mr. Allen's land is about 20 inches to gravel and has a high intake rate. The additional water to take care of the problem will be beneficial. The water is used mainly to get a larger head to push it across the land, this is an accepted method of irrigation here.

I have reviewed the deeds submitted to show Mr. Woodie's ownership of the land from which the water is being transferred (Mr. Woodie signed the application along with Mr. Allen). Apparently, Mr. Woodie does own the land but did not receive any interest in License No. 20629/33-2047 from Wayne Bare.

Mr. Allen showed several documents conveying the pump, well and eventually the water right from Mr. Bare to him, but I did not take copies.

Attached herewith is departmental receipt No. 12901 in the amount of \$10.00 for the above referenced application which was received in this office on June 3, 1974.

The land to which you wish to transfer License #33-2047 is already covered by two licensed rights from a ground water source listed as follows:

License No. 33-2044 - 1.74 c.f.s. - point of diversion; SE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 22, T. 6N, R. 29E - place of use: SE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 22, 7 acres; NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 27, 40 acres; SW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 27, 40 acres; Total 87 acres.

License No. 33-2077 - 2.2 c.f.s. - point of diversion: NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 27, T. 6N, R. 29E - place of use: NE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 27, 40 acres; SW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 27, SW $\frac{1}{4}$ NW $\frac{1}{4}$, 15 acres; NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 27, 35 acres, SE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 27, 20 acres. Total 110 acres.

The Idaho Code limits the rate of diversion for irrigation purposes to 1 cubic feet per second for each 50 acres irrigated, unless a higher rate can be justified by coarse soils or unusual irrigation systems. This application for transfer of License No. 33-2047 cannot be approved by the Department, unless you show that the higher than normal rate of diversion is actually justified. The Department accepts as sufficient justification statements from the Soil Conservation Service or other soil experts providing detailed soils and engineering data showing that the amount of water requested is actually needed for the use proposed. This statement should specifically state the diversion rate actually required for the irrigation of the property in question.

Also, as we had previously discussed, the Department will require a copy of the deed showing Mr. Woody does own the N $\frac{1}{2}$, Sec. 36, T. 6N, R. 29E, B.M. and thus, releases the water to you.

If you have any questions concerning this matter, do not hesitate to contact this office.

Very truly yours,

NORMAN C. YOUNG

Dear Mr. Allen:

Please find enclosed your application for transfer which we must return because the statutory filing fee of \$30.00 was not included.

In checking this proposed transfer, we find that the land that you propose to irrigate in the W¹/4 NE¹/4, Sec. 27, T. 6N, R. 29E, B.M., is already covered by License No. 33-2044. This transfer in combination with this existing right would result in an excess of the statutory limitation on this 80 acre tract. It is unlikely that your application for transfer can be approved unless this conflict is first resolved. We also need a copy of a deed, sales agreement or other suitable documents indicating the ownership of the land in Section 36 from which the water is to be transferred.

If you have any questions, please do not hesitate to contact us.

Once a water license is granted it then becomes appurtenant to the land and the land owner in turn owns the license. It should however, be shown on deeds or bills of sale and listed by number. It does not have to be assigned in our office. You will note that prior to issuance of the license the permit was assigned to Clarence D. Finch who received the original license.

PROOF OF COMPLETION OF WORKS

Boise, Idaho

Dear Sir:-

Under the terms of your Permit No. 20629.....you are required to complete your diversion works on or before September 2, 1953..... I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Dear Mr. and Mrs. Solem:

In reply to your letter of December 17, 1951, in which you state that you are starting final proof on your irrigation wells, covered by Permits Nos. 20361 and 20629.

The proofs were due on Permit No. 20361 on or before March 31, 1951. These proofs have not been made, and technically Permit No. 20361 is subject to cancellation for that reason. However, an extension can still be allowed and we enclose a form of application for such extension herewith. This should be executed before a Notary Public and returned promptly to this department.
