Re: Application for Transfer - Salmon Falls Land and Livestock Dairy

Dear Corey:

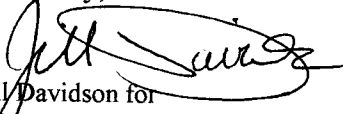

Enclosed is a revised application for a water right transfer to provide a water supply for the planned Salmon Falls Land and Livestock dairy south west of Hagerman. The application proposes to transfer all of irrigation water right 47-02386A which is a ground water irrigation right for 76 acres from the place of use which is approximately five miles west of the proposed dairy. Also included in the application is stockwater for approximately 600 head of range cattle.

- I have addressed the five items which you outlined in your letter of June 16. The fee for \$290 is enclosed in (Brockway Engineering Check #5689).
- A warranty deed showing ownership of the SE ¼ SE ¼ Sec 14 T 8S R 13E is attached.
- The three (3) proposed points of diversion are shown on the attached aerial photo map and included on the second page of the application.
- Also attached is an affidavit by Harry LeMoyne, former owner of the irrigated farm which indicates that the primary crops were barley and small grains when he irrigated the farm. I have therefore used the consumptive irrigation requirement for spring wheat in determining the allowable net use for the dairy (2.16 afa).
- I have further clarified the site map to show the approximate location of the dairy and lagoons as well as the locations of the stock watering troughs.

Also included with the revised application are water requirements worksheets (IDWR and Brockway Engineering), water balance analyses of aquifer impact, local well interference estimates, site maps (aerial photos) of locations of the dairy and liquid waste application locations including runoff retention ponds, ET tables from Allen and Brockway, 1983, and warranty deeds for the dairy site and agreements for water right transfer.

I appreciate your prompt review the application. Let me know if additional information is required.

Sincerely,

Jill Davidson for
