Eastern Region

Dear Mr. Keen:

This letter is submitted as my request for reconsideration of changes made and conditions added to water right license 25-07545.

I was surprised to find that the state office of IDWR would change the acreage found by the water right agent who did the licensing exam. It would seem that with the kind of technology that must be available to the state office of the IDWR field inspections are a waste of time and tax payer money. The fact is, the area under a center pivot is very well defined and can be computed precisely if you know the length of the pivot and the range of the end gun. I believe the reduction of eight (8) acres recommended by the field examiner was not justified and I am respectfully requesting your reconsideration.

Very truly yours,

Russell Schwendiman
