administration of the water rights as may be ultimately
determined by the Court at a point in time no later than the
entry of a final unified decree. Section 42-1412(6), Idaho
Code.

Priority of appropriation shall give the better right as among
those using the surface and ground waters of Mill Creek, Warm
Springs, Spring Creek, Summit Creek, and their tributaries, and
rights having the same priority date shall share equally in the
available water supply in a manner that will equally apportion
all natural channel losses among rights having the same date of
priority. For example, if there are seven points of diversion
from the natural channel, which have the same 1879 date of
priority, and the flow in the stream is equal to one-half of the
amount of flow necessary to fully satisfy all of the 1879
priorities at their respective points of diversion, then the
diversion rates at each of the seven points of diversion shall
be reduced by one-half. A pro rata sharing of the water in the
stream shall continue to be enforced among rights of equal 1879
priority until the watermaster shall have determined that water

Thereafter, upstream 1879 appropriators who are still able to receive water in a sufficient quantity to be applied to beneficial use shall continue a pro rata sharing of the water in the stream.
