Roger, have you seen this project site? We may have a concern or two, will have to visit this one. Can you leave the office for stuff like this?

Dave

Mr. Warner:

I have some questions about this project:

1. will the spring head be totally enclosed or is it currently
2. will this result in piping a portion of the stream that's currently open channel
3. the UFS Special-Use Permit lists *installation and fencing of a water collection system* with
 - a. a 2500' buried 4" pipe and (hatchery)
 - b. a 2500' 1/2" pipe (culinary)

I assume the 4" line already exists and this will be in addition.

Thanks Much

Jim
