Subject: Application for Transfer – LDS Caldwell Stake FS Project (Farmway Road, PN572-8428)

Dear Steve:

On behalf of The Church of Jesus Christ of Latter Day Saints, I am pleased to submit the enclosed Application for Transfer of Water Right for a property on Farmway Road near Caldwell. A check for the \$100 application fee is enclosed.

The Farmway Road facility will have 2.4 acres of landscape irrigation. We are proposing to transfer a 2.4-acre portion of water right 63-9972. Water right 63-9972 is a water right license for irrigation of 30 acres at a turf farm near Meridian. The 2.4 acre portion of water right 63-9972 is being purchased by the Church for this project.

Enclosed is a copy of the water right purchase agreement between Renata Ham and the Church. The agreement provides for the Church to purchase a 2.4-acre portion of water right 63-9972. The purchase will be finalized following approval of the transfer application. Use of water under water right 63-9972 and ownership of the water right is documented by the Affidavit of Renata Ham that is on-file with the Department.

Please contact me with any questions.

Sincerely,

Terry M. Scanlan, P.E.

Subject: Irrigated Acres For Water Right Number 63-4949

There is an estimated 3.22 irrigated acres on the Canyon Building #35 property. Using ArcView, the property boundary was estimated from the 1987 near-infrared aerial photography provided by IDWR. The property acre amount (4.8 acres) is close to the 4.86 acres described by Ron Norman during our phone conversation with him. Buildings and parking lot areas were subtracted from the property acres to calculate the irrigated acres. Attached is a figure displaying the total acres, parking lot and building areas, and the resulting irrigated acres.

Salt Lake City, UT 84150

Dear Alice,

This is in regards to the fire at the Canyon Building #35 (5033179-02) which was built in the late nineteen-forties and was in use from that time until the fire. According to our files we show that the fire actually started in September of 1995, at which time we had a well that was used for irrigation purposes prior to that fire. The well was capped off w.r.#63-0494 about thirty (30) days after the fire and with the construction of a new building we had access to the City Culinary Water and pressurized water for irrigation purposes.

If there are any questions or changes concerning these items or issues please feel free to call Rob Norman @ (208) 467-2421.

Sincerely,

Robert J. Norman – FM Manager
Merrill K. Bastian – Previous FM Mgr.
