WELL LOG AND REPORT OF THE STATE RECLAMATION ENGINEER OF IDAHO

Permit No. _____ Well No. _____ County Canyon

Owner Don Rumpke

Address 212 Main Ave Nampa Idaho

Driller Donna Well Drilling (Charles Davis)

Address 273 Davis Ave Nampa Idaho

Well location SW 1/4 NE 1/4 Sec. 21, T. 3 N. R. 2 E

Size of drilled hole 6 in

Locate well in section

NW 1/4	NE 1/4
SW 1/4	SE 1/4

Total depth of well 45

Give depth to standing water from the ground 10 ft Water temp. _____ °Fahr.

On "Pumping Test" delivery was _____ g.p.m. or _____ c.f.s. Drawdown was _____ feet.

Size of pump and motor used to make test _____

Length of time of test _____ hours _____ minutes.

If flowing well, give flow _____ c.f.s. or _____ g.p.m. and of shut off pressure _____

If flowing well, described control works _____

(TYPE AND SIZE OF VALVE; ETC.)

Water will be used for Irrigation & Swimming Pool Weight of casing per lineal foot _____

Thickness of casing 1.88 Casing material black pipe

(STEEL, CONCRETE, WOOD, ETC.)

Diameter, length and location of casing 6 in - 33 1/2 ft

(CASING 12" IN DIAMETER OR LESS, GIVE INSIDE DIAMETER;
CASING OVER 12" IN DIAMETER, GIVE OUTSIDE DIAMETER)

CASING RECORD

Diam. Casing	From Feet	To Feet	Length	Remarks—seals, grouting, etc.
6 in	Surface	33 1/2	33 1/2

To Whom It May Concern:

In approximately 1951 or 1952, I drilled a well for The Church of Jesus Christ of Latter Day Saints at the meetinghouse that was under construction at that time on Canyon Street in Nampa. To construct the well, I hired a drill rig and two-man crew from Hosac Drilling. We constructed a 6-inch diameter well to a depth of 90 feet and equipped the well with a centrifugal pump for domestic and irrigation purposes.

AFFIDAVIT THANE J. RIDER and ROBERT J. NORMAN

THANE J. RIDER and ROBERT J. NORMAN, being first duly sworn, depose and say:

1. Corporation of the Presiding Bishop of The Church of Jesus Christ of Latter-Day Saints, a Utah corporation sole (CPB) owns a parcel of property in Nampa, Idaho, located at a street address of 121 Canyon St., Nampa, Idaho 83651, which it refers to as the Canyon 35 building. CPB has a Physical Facilities department that manages its buildings. The office that supervises and takes care of the Canyon 35 building is the Caldwell-Nampa Facilities Management Group. From 1990 to present, the mechanic with responsibility for the Canyon 35 building and surrounding property, including the 3.0 acres irrigated from the well that is the subject of this affidavit, was Thane J. Rider, and from 2002 to the present it has been Robert J. Norman was also a mechanic in this FM Group.

2. Robert J. Norman, 1712 Emerald Ave Caldwell ID 83605, began employment with the Caldwell-Nampa Facilities Management Group in Caldwell, Idaho in April, 1992, and is generally familiar with the operation of the Canyon 35 property from that time to now.

3. Thane J. Rider, 15753 Yoder Avenue, Caldwell ID 83607, began his employment with the Caldwell-Nampa Facilities Management Group in Caldwell, Idaho in 1983, and was supervisor of maintenance and operation at the Canyon 35 building from 1990 to the present.

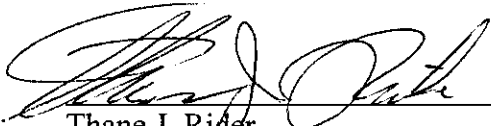

4. CPB had a well located at the Canyon 35 building, identified as No. a63-04949 in Nampa, Idaho with a point of diversion located in SE 1/4 SW 1/4 NE 1/4, Section 21, Township 3 North, Range 2 West, Canyon County, State of Idaho, which was permitted for a total consumptive use of ten and one-half acre feet per annum for irrigation of 3.0 acres as per the Notice of Claim filed December 26, 1989 with the Idaho Department of Water Resources.

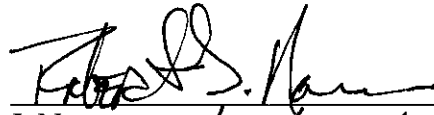

5. The well was the only source of water for irrigating the 3.0 acres of the site. It was in use from the initial establishment of the water right until October 1995 to irrigate 3.0 acres. There was no water from Nampa and Meridian Irrigation District available at the site because there were no ditches or pipelines installed from any facilities of the District that would deliver such water.

6. This well was used for both culinary and irrigation purposes after it was originally established based on Claim No. 63-04949 that was submitted January 19, 1983. Sometime prior to the filing of the Notice of Claim in the general adjudication, however, the culinary use was discontinued and the irrigation use continued irrigating approximately three acres as shown by the claim on file in the general adjudication referred to above.

7. In September 1995, there was a fire at the Canyon 35 building, which destroyed a considerable amount of the property. Prior to the fire the water right was used each year from 1991 to 1995 with which affiants are familiar to irrigate the 3.0 acres at Building 35.

8. After the fire, it was determined that a new meetinghouse would be built on the site. Those portions of the meetinghouse that could not be repaired were torn down and removed and as part of the construction process, the 63-4949 well was capped in about November of 1995. After the new building was completed, it was connected to the culinary water system of the City of Nampa and a pressurized irrigation system provided by the City was used.

Thane J. Rider
