\$50 Fee Received by 165Date 11-18-97Receipt No. 100000002**REQUEST FOR EXTENSION OF TIME**  
**TO PROVIDE ADDITIONAL TIME IN WHICH TO SUBMIT PROOF OF**  
**BENEFICIAL USE FOR A WATER RIGHT PERMIT**

The Idaho Department of Water Resources will consider this form as a request that the permit holder(s) be granted an additional period of time under the provisions of Section 42-204, Idaho Code in which to complete development of a water right.

Permit No. 61-07690Name(s) of Permit Holder: COLD SPRINGS FARMMailing Address: P.O. BOX 105, HAMMETT, ID 83627 (new)Date Proof is Due: December 1, 1997Telephone No. (208) 366-7993

Describe what work has been completed toward the development of this water right:  
(This must be filled out! If no work has been completed, show "none".)

The well was dug and cased before the permit was issued - cost unknown; well examined and report made by Sherl Chapman in 1995 - Cost \$1,846.89; well was acidized in 1995 - cost \$2,809.88; 960' x 4" PVC mainline w/valves & risers

Costing \$ 1,000 Est.

TOTAL COST APPROX. \$5,655.00

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

Idaho Power estimated cost in excess of \$20,000.00 to extend power line from north side of I-84; distance is much shorter from south side but requires right of way from U.S. Dept. of Transportation under I-84. We are working with Idaho Power to establish exact location of right of way. Propose to run the power line through the same 16" pipe that serves as a sleeve for existing mainline from King Hill Irrigation District canal.

Permit holder(s) request an extension to December 1, ~~19~~ 2000.COLD SPRINGS FARM

FEE: \$50.00

By W.F. Ringert

(Signature)\* W.F. Ringert, Partner

\*If other than permit holder, Power of Attorney must be supplied.

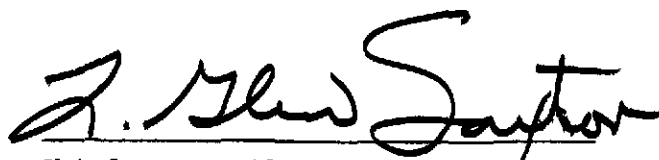

**ACTION OF THE DEPARTMENT OF WATER RESOURCES**

IT IS HEREBY ORDERED that the above request for extension of time be APPROVED and the time within which to submit proof of beneficial use is extended to December 1, 2000.

CONDITIONS/REMARKS:

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before **December 1, 1997**.
2. Subject to all prior water rights.
3. Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
4. The right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
5. Any license issued by IDWR pursuant to the right or portion thereof for the use of trust water is subject to a term review of 20 years after the date of this approval to determine availability of water for the use and to re-evaluate the public interest at the end of the term.

DEC 20 1994

State of Idaho  
Department of Water Resources**Permit To Appropriate Water**

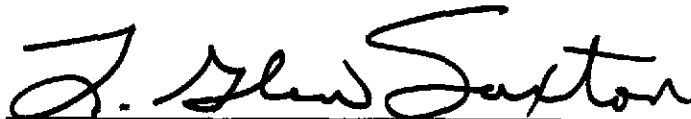

NO. 61-07690

CONDITIONS/REMARKS:

6. Diversion and use of water under this right is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.
7. The Director retains jurisdiction of this right and/or subsequent license issued to change, add or remove any requirement as determined to be appropriate.
8. The right holder shall use the full allotment of his surface water right, to the extent it is available, in conjunction with groundwater diverted pursuant to this right.
9. The rate of diversion of water for irrigation under this right and all other water rights on the same land shall not exceed 0.02 cubic feet per second for each acre of land.
10. Commercial use is for a service station, motel, restaurant, retail stores, offices and erosion control.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code.  
Witness the signature of the Director, affixed at Boise, this

### ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No \_\_\_\_\_, and said application is hereby \_\_\_\_\_.

1 Approval of said application is subject to the following limitations and conditions

a SUBJECT TO ALL PRIOR WATER RIGHTS.

b Proof of construction of works and application of water to beneficial use shall be submitted on or before \_\_\_\_\_, 19 \_\_\_\_\_

c The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land

d The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

ED 2012

## MEMORANDUM

TO FILE 61-07690 )  
FROM DANIEL A NELSON  
DATE 7/17/01  
SUBJECT MEASURING DEVICE INQUIRY

On this Date Bill Ringert of Cold Springs Farms (right number 61-7690) called our office and requested information regarding the measurement requirement listed on their permit in condition number 2 (condition 01K). I called Sharla Curtis to confirm that this condition is no longer used, since we can use a polysonic unit or a theoretical calculation to determine the flow rate of the well. Sharla told me that we currently add the condition that the director retains the right to require the right holder to measure and report if needed (condition O1M). I called Mr. Ringert back and informed him that he would need to supply us a place to measure the well during the field exam I also told Mr Ringert that he may need to install a measurement device in the future if the Director determined that it would be necessary for him to annually measure and report his diversion to department through a measurement district, water district, or other requirement

HAMMETT ID 83627

**PROOF ACKNOWLEDGMENT LETTER**

**RE: PERMIT NO. 61-07690**

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit.

The proof you submitted states you have not installed a measuring device. However, according to your permit's Conditions/Remarks, paragraph 4, you must have,

"...a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion

In order to maintain your permit in good standing, this condition must be in place or finalized at the time the department conducts a field examination of your water use. If you have means of measurement located at all authorized points of diversion, which the department can access for measurement purposes, then that requirement has been met.

Please be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water. If

**MICROFILMED**

PROOF DUE NOTICE

RE: PERMIT NO. 61-07690

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before December 1, 2000.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

DEBORAH GIBSON  
Administrative Assistant

**RE: Permit No. 61-07690**

Dear Permit Holder:

I have enclosed a copy of the approved request for extension of time submitted in connection with the above referenced permit which extends the time within which to submit proof of beneficial use to **December 1, 2000**. Please note that the department granted the extension based on **due diligence**. It is important that you work diligently toward the completion of the development during the construction period allowed since the department **will not** be able to grant additional extensions based on due diligence.

Section 42-248, Idaho Code, which became effective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact this office or any regional office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner.

Please contact me at (208)327-7953, if you have any questions regarding this matter.

Sincerely,

JULIE L. YARBROUGH  
Senior Secretary, Water Allocation Bureau

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 61-07690

Dear Permit Holder(s):

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed.

The Department will send you a "Proof Due Notice" approximately 60 days prior to the above referenced date requesting you to file either a Proof of Beneficial Use form or a Request for Extension of Time form.

This permit authorizes the appropriation of trust water. Trust water is defined as that portion of a particular hydropower water right which exceeds certain minimum stream flows established by state action, and is held in trust by the State of Idaho for the use and benefit of the people within the state. Conditions pertaining to a term review, annual use fee and jurisdiction of the permit are trust water conditions.

Sincerely,

  
JIM JOHNSON, Manager  
Water Right Permits Section

Conditions of Approval:

- 26A - Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
- 01K - The right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
- 051 - Any license issued by IDWR pursuant to the right or portion thereof for the use of trust water is subject to a term review of 20 years after the date of this approval to determine availability of water for the use and to re-evaluate the public interest at the end of the term.
- 052 - Diversion and use of water under this right is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.
- 053 - The Director retains jurisdiction of this right and/or subsequent license issued to change, add or remove any requirement as determined to be appropriate.

Conditions of Approval:

- 803 - The right holder shall use the full allotment of his surface  
- water right, to the extent it is available, in conjunction with  
- groundwater diverted pursuant to this right.  
03A - The rate of diversion of water for irrigation under this right  
- and all other water rights on the same land shall not exceed 0.02  
- cubic feet per second for each acre of land.

Remarks: Commercial use is for a service station, motel, restaurant,  
retail stores, offices and erosion control.

APPROPRIATION APPLICATION ANALYSIS SHEET

INITIAL REVIEW BY: SL DATE: 5/10/94 APPLICATION: 61-07690

REQUIRED INFORMATION

*See attached Certificate w/ application*

Name: (If applicant is a corporation or partnership, names and addresses for the director, officers, and other partners must be included.)  
Address:  
Source: (See USGS Quad for names of water sources)  
Point of Diversion: (10 acres for spring, lot & block descriptions for Subdivisions, local name)  
County:  
Quantity: (flow and/or volume)  
Period of use:  
Nature of proposed use: (Include description of use)  
Description of diverting works:  
Time required for beneficial use of water:  
Place of use or acres irrigated:  
Map:  
Signature: (If applicant is corp., partnership, or municipality, title of signatory is required)  
Fee:  
Yes ☐ No ☒ In form to receipt:

Re: Application for Water Permit No. 61-07690

Dear Gentlemen:

In response to your letter dated June 13, 1994, the Board of Elmore County Commissioners has no objection to the issuance of a permit for the appropriation of water from the existing well located on your Cold Springs Farm at Hammett, Idaho.

You are reminded, however, that a conditional use permit or other zoning approval will be required for any land use that is not authorized by the existing zoning on your property.

Sincerely,

BOARD OF ELMORE COUNTY COMMISSIONERS

Re: Application for Water Permit No. 61-07690

Dear Commissioners:

Cold Springs Farm, a partnership consisting of myself, Gary Ringert and Jim Schrader, has filed an application with the Idaho Department of Water Resources for a water permit to pump water from an existing well on our farm in the northeast quadrant of the Hammett Interchange on I-84. I think the well was drilled by a previous owner (Joe Lamb) sometime in the 1970's, but did not produce enough water to irrigate the 260 acres and was never developed. The land is in King Hill Irrigation District and receives water from the District during the regular irrigation season. We would like to be able to have water available from the well for supplemental irrigation before and after the District has water in the canal.

The well reportedly was test-pumped at approximately 360 gallons per minute. Our application is for 450 gallons per minute, anticipating that the well could produce a higher volume for short periods of time.

Because of its location at the Hammett Interchange, we feel the property has potential for development of a service station, restaurant and other commercial uses to serve both the traveling public and the local area. With that in mind, we have included commercial use as part of the application.

A copy of the application is enclosed. The regulations of the Idaho Department of Water Resources require an applicant to seek comments and submit all letters of comment on the effects of the construction and operation of the proposed project from the governing body of the county in which the point of diversion and place of use are located. Please furnish us your comments on behalf of Elmore County, so that we can satisfy this requirement in the permitting process. If you need additional information from us, please contact me regarding the technical aspects or contact Jim Schrader (366-2655) regarding the operational aspects of the irrigation usage. Also, we can be available for a meeting at your offices, if necessary.

We are aware that zoning action probably will be required in order to authorize any change we might wish to make from agricultural use to commercial use. We agree in advance that any zoning action is entirely separate from the administrative action regarding the water permit, and that any favorable comments you might make concerning the application for the water permit would not be binding with respect to any subsequent zoning activity.

Please contact me if you have any questions regarding this request, and thank you for your attention this matter.

Re: Cold Springs Farm  
Application for Permit No. 61-07690

Dear Mr. Lester:

This is in response to your letter of May 10, 1994, regarding Application No. 61-07690.

With respect to the 200-acre requirement of IDAPA 37.03.08.05.C., as it pertains to this application, the proposed irrigation use is supplemental, only, and it is not anticipated that full season irrigation for any part of the farm will be necessary under the requested permit. Full time irrigation water is received from King Hill Irrigation District, and these lands are within the boundaries of KHID.

We envision the use of water on portions of the land early in the crop year, before KHID commences deliveries, for early irrigation of winter grain, or to provide sufficient moisture for proper seedbed preparation for early planting, such as sugar beets, or for early irrigation of an existing stand of alfalfa after an unusually dry winter. Due to crop rotation, it is doubtful that more than one-half of the farm would require early irrigation in any given year.

During the regular irrigation season, water under this application would be required only in situations where the KHID delivery system was temporarily out of service, and the well then would be used to supply the temporary critical needs of growing crops.

Late season irrigation would be for such purposes as application of Vapam in preparation for planting potatoes in the following year, pre-irrigation for late harvest potatoes, and late irrigation of existing stands of alfalfa to provide a moisture reserve to help the plants "winter" better, and irrigation of fall-planted winter barley or winter wheat in

Mr. Steve Lester  
May 31, 1994  
Page 2

situations where fall precipitation is not adequate for germination and sufficient root growth for the young plants to make it through the winter.

As is the case with respect to early irrigation, crop rotation is expected to be such that not more than one-half of the farm would require fall irrigation under this application in any given year. However, in either early or late irrigation, it is remotely possible that a combination of factors could result in the need for water on more than 200 acres during a given calendar year. We would anticipate that such a need would be of relatively short duration, and probably would not exceed 30 days on either end of the season.

I am enclosing a copy of a portion of the USGS 7½ minute topographical map for the Hammett quadrangle, showing the possible location of the wells located within approximately a one-half mile radius of the existing well for which the application is submitted. I have asked Jim Schrader to check out these locations with the property owners.

We are in the process of seeking comments from the Board of Commissioners of Elmore County and from the Board of Directors of King Hill Irrigation District as required by IDAPA 37.03.08.G.

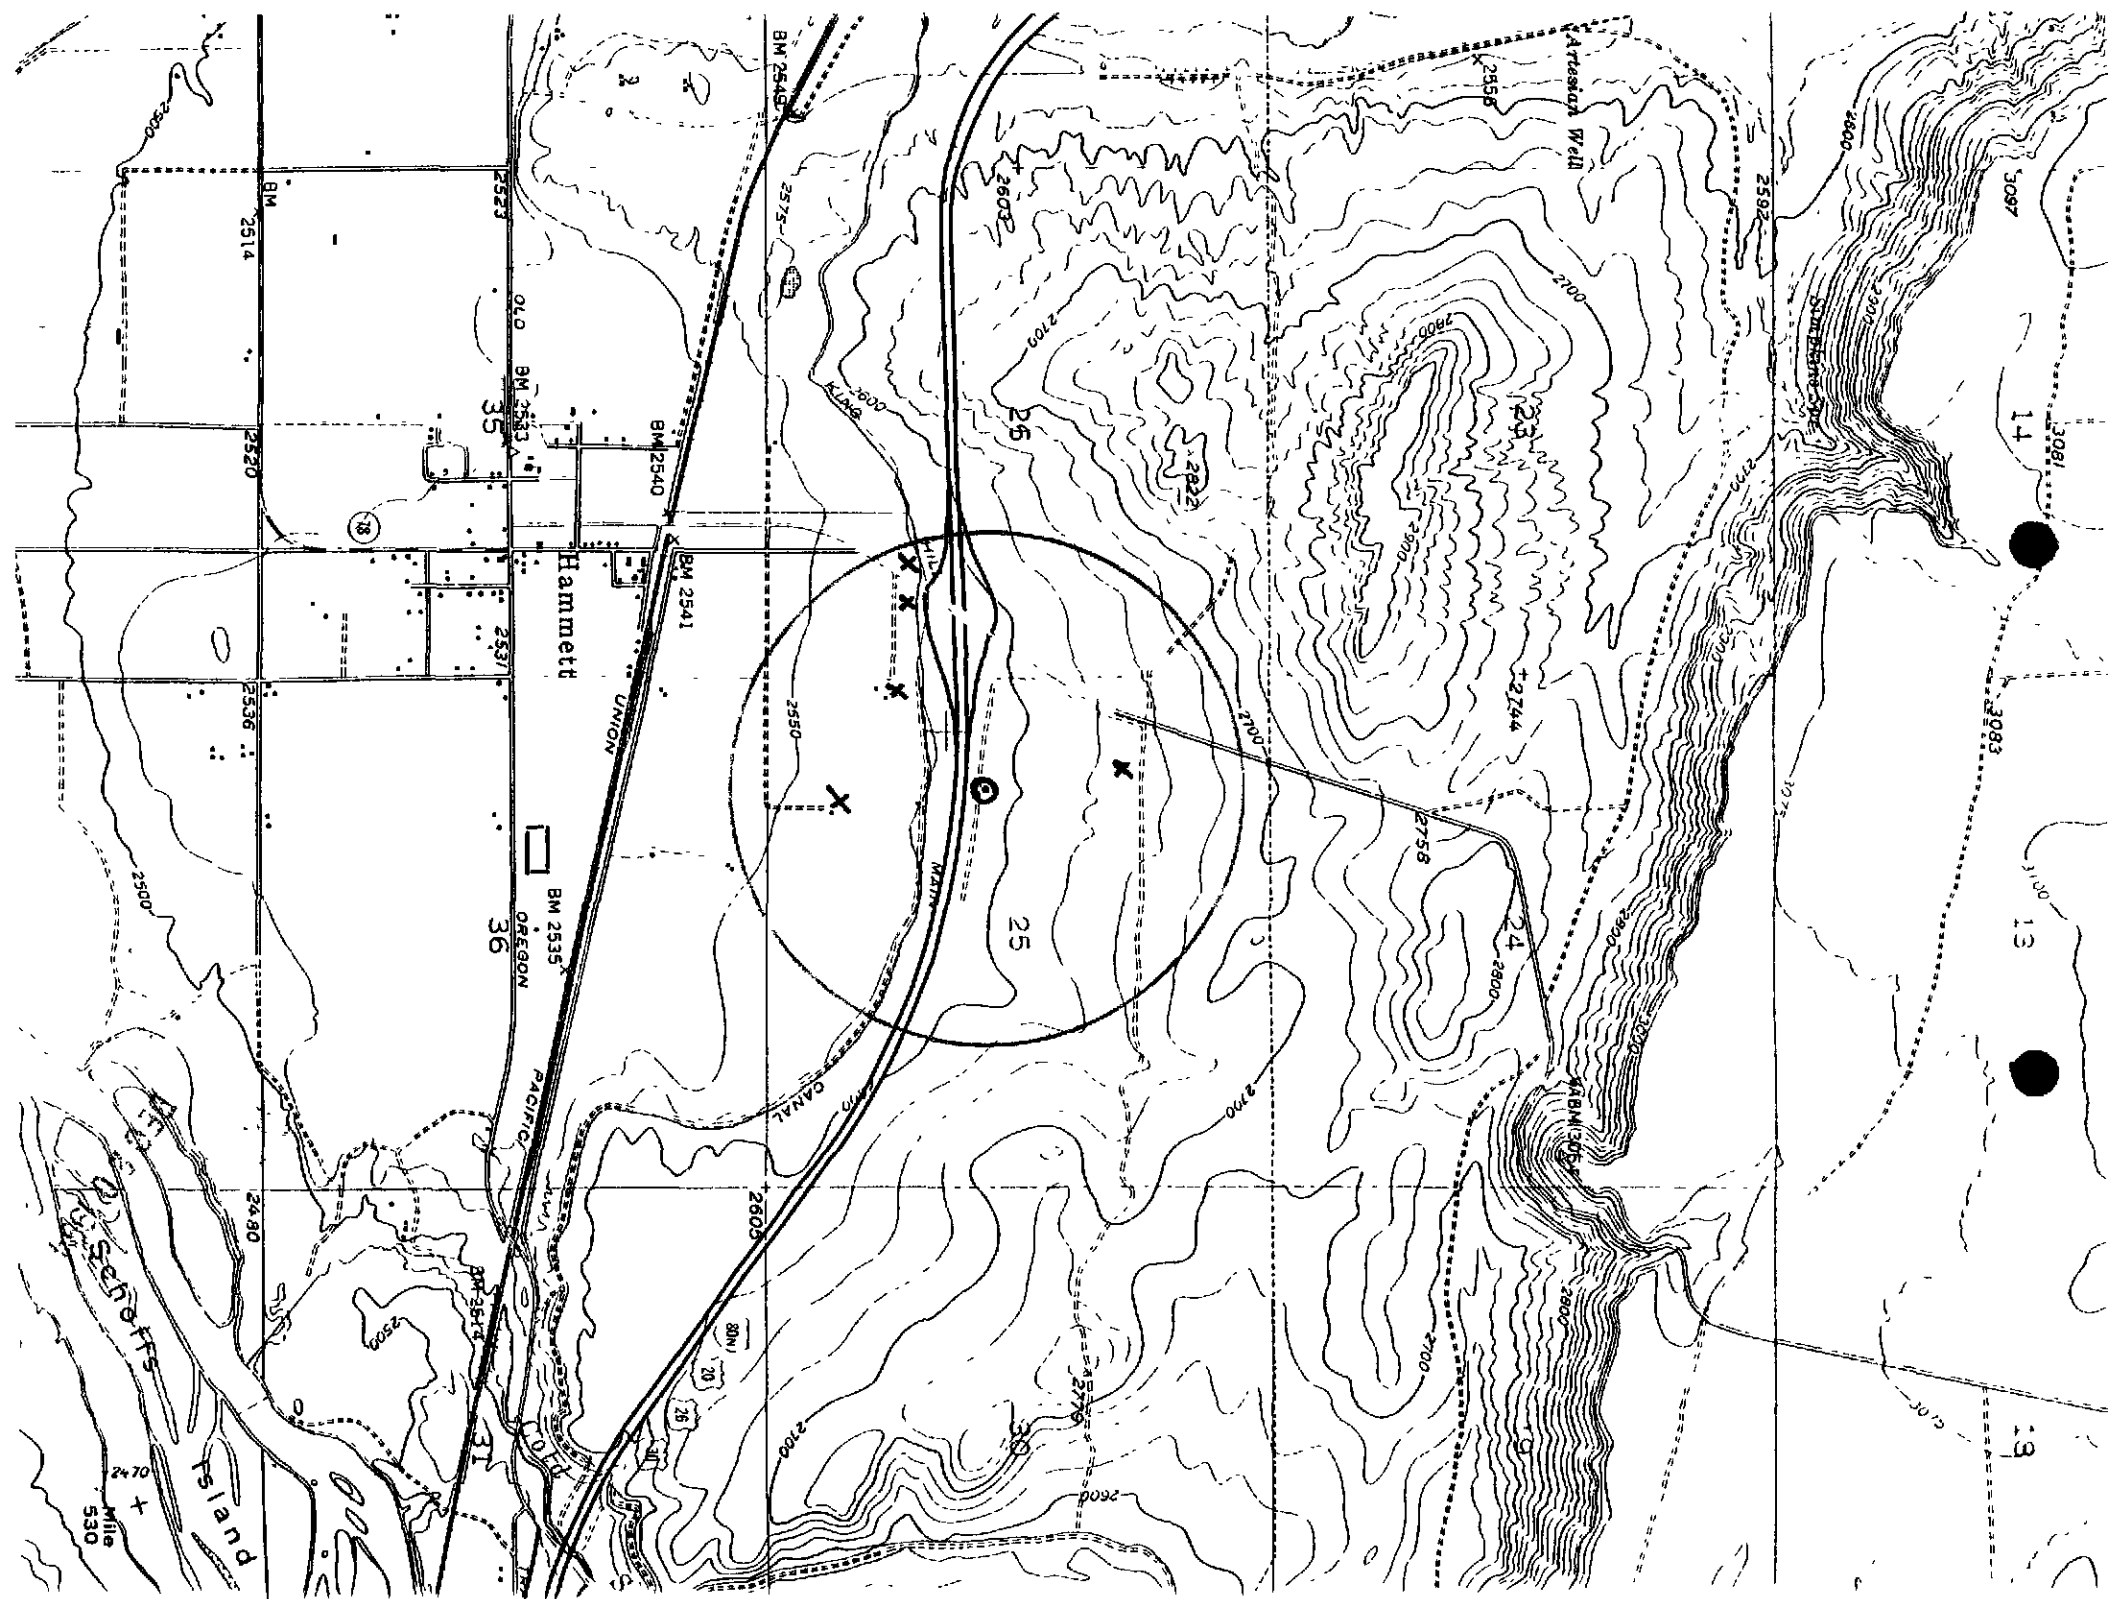

I believe the foregoing initially addresses the items highlighted in the portions of the regulations accompanying your letter of May 10, 1994. Information in addition to that discussed above will be furnished as soon as it is available.

Yours very truly,

A handwritten signature in cursive script, appearing to read 'W. F. Ringert', written in dark ink.

RE: Application for Permit No. 61-07690

Dear Mr. Ringert:

The above-referenced application for water right permit is in the process of being advertised. The application includes a well to irrigate 265 acres in Sections 24 and 25, T05S, R08E, Elmore County. Also included as uses are fire protection, commercial and erosion control. Because the latter is not recognized as a beneficial use, at least with that language, the commercial use has been modified to include erosion control. After advertising but before the application can be forwarded from this office to our state office for final action, other information is needed.

Based on Idaho Code 42-203A(5)(a-e), additional information is needed for applications for permit involving irrigation of more than 200 acres and/or diversions exceeding 5.00 cfs or 500 acre-feet of storage. Please provide information relating to the proposed water right as outlined in the attached copy of Water Appropriation Rules 37.03.08.05(c) through (g), formerly known as rules 4,5,3,1 through 4,5,3,5 under the old numbering system. This covers the following items:

- a) effect on existing water rights
- b) sufficiency of water supply
- c) good faith, delay, or speculative purposes
- d) financial resources
- e) local public interest

*/ plat of wells & springs*

*letters from county & irrg. dist.*

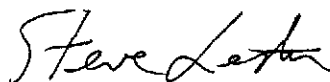

The items to be answered are highlighted in the attached pages. Note that only an abbreviated response is needed for supplemental irrigation use. Although the application falls within the trust water boundary, my evaluation of this situation is that rule 37.03.08.05(h) on pages 22-24 does not apply to this supplemental situation.
