System consists of a steel tank ring placed $\approx 15'$ down into a spring. A culvert is placed vertically into the tank. A 4" x 15' length of steel pipe is placed inside the culvert. A pump is attached to some railroad ties on top of the culvert. The water is pumped through one line of length 400' (diameter = 2.5") to irrigate one parcel of land (1.5 acres). The spring is also pumped (via a 120' x 2.5" length of pipe) to flood irrigate another parcel of land.

Dear Mr. Shaw:

A copy of your letter of April 28, 1981, confirming our telephone conversation of that date and advising that the published notice for Application No. 61-7431 did contain a final date for submitting protests, was sent to the Board of Directors of Mountain Home Irrigation District with my recommendation that the request for cancellation of Permit No. 61-7431 be withdrawn. The Board of Directors concurred in that recommendation, and so advised me by letter received this morning.

Therefore, the request of Mountain Home Irrigation District for cancellation of Permit No. 61-7431 is hereby withdrawn.

RE: Applications for Permit Nos. 61-7430 and 61-7431
In the name of Joseph W. Twitchell

Dear Mr. Ringert:

I am in receipt of your letter of April 9, 1981 and the accompanying protest against the above numbered applications for permit. Application for Permit No. 61-7431 for the appropriation of 0.01 cubic feet per second from a spring tributary to sinks was approved on April 2, 1981. The second application, 61-7430, for the appropriation of 0.40 cubic feet per second from Rattlesnake Creek is currently being readvertised and therefore the protest period has not ended and your protest will be recognized against this filing.

As is our usual procedure, we suggest that you contact the applicant to discuss the application and attempt to resolve the protest. If this office has not been advised within 20 days that the protest is being resolved, the matter will be scheduled for conference and/or hearing. At such a conference and/or hearing, the following are the principal items the department can consider in either approving or denying an application for permit (§42-203, Idaho Code):

1. Will the proposed use reduce the ^{quantity}~~quality~~ of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

Dear Mr. Twitchell,

RE: Permit No. 61-7431

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

The exercise of this permit may also be affected by the Supreme Court's review of the case of Idaho Power Company vs. State of Idaho, et al., Ada County Civil No. 62237, currently being appealed to the Supreme Court of Idaho. Since the use of water under your permit may affect the flows in the Snake River between Milner Dam and Hells Canyon the final decision in this case may determine to what extent the exercise of your permit is subject to water rights of Idaho Power. While the Supreme Court is reviewing this case, Idaho Power Company has not filed a specific protest to your permit. However, the Department of Water Resources has been advised that the Power Company is not waiving any of its rights to contest or limit the exercise of your permit or subsequent license.

We have enclosed a form entitled "Making Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

DAVID R. TUTHILL, JR., P.E.

Dear Mr. Twitchell:

In reviewing your recently submitted application for permit, we have taken the liberty of retyping and suggesting a few changes.

Enclosed are three applications for your review. One application includes both sources, the spring and Rattlesnake Creek. The only problem that could arise with this one is if the irrigation district were to protest the application because it includes Rattlesnake Creek. Even though the storage period would not begin until after their irrigation period is completed, they may protest it. This would then also tie up the approval of a water right from the spring.

Therefore, if you feel there is a change the irrigation district will protest this application, it may be to your advantage to file two applications. One would list the spring and all uses appropriate and one would list Rattlesnake Creek and all uses appropriate. This system would cost another \$30 for the second application. But, if the district protests the Rattlesnake Creek application then the spring application would not be affected and could be processed. When a protest is filed, a conference is held to hear both sides and hopefully a compromise is reached then. If not, a formal hearing is held.

If you decide to file the one application with both sources, please sign it and return it to this office. Your priority date will be the date it was received earlier or January 2, 1981.

If you decide to file the two applications, please submit the necessary \$30. fee for the second application. If you have any questions concerning this matter, please contact us.

Sincerely,
